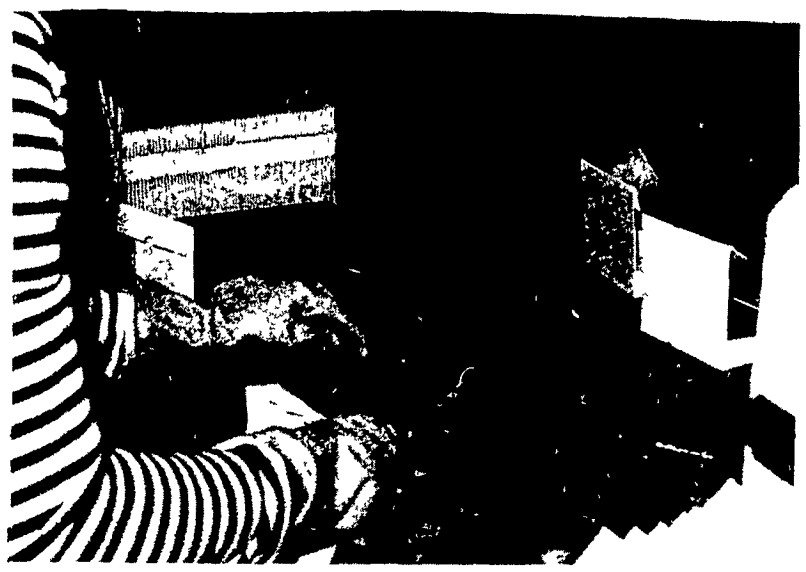
Saturday, May 20

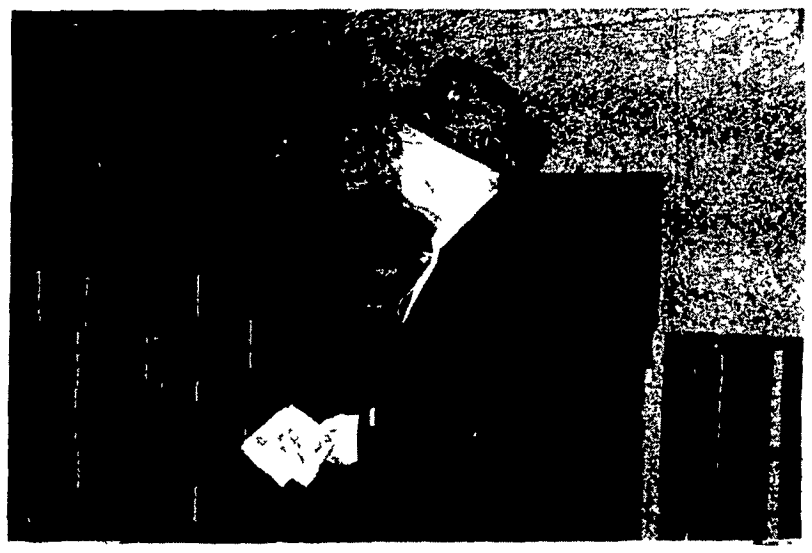
9:30 a.m. - 3 p.m. -- County Council car wash, Wolf Motors, 1485 Manheim Pike, Lancaster.

Finding a Way to Process Food Better

John F. Cope



The more hands involved in handling asparagus, the higher the cost. Yet, it is this rapid handling that assures the consumer of a fresh, tender product.



John Cope looks over the stock in his freezer at the East Petersburg processing plant. Once asparagus is frozen it is kept here at zero degrees until ready for shipping.

How many times have you gone to your local supermarket, saw fresh, green asparagus and then decided not bo buy it because of the price? "Asparagus is costly because of the way it must be processed There are a great many hands involved to get that asparagus from the field onto your table "

So says John Cope, owner of John F Cope, Inc , Manheim, RD 1 And he ought to know, because he has been growing, processing and selling asparagus since 1948

Now Cope's Corn is widely known throughout this area But so is Cope's Asparagus and since this is the time of the year for the processing of the tender, green stalks, **Lancaster Farming** visited the John F Cope processing plant near East Petersburg

"I first began to grow and process asparagus in 1948 I didn't even like the stuff at the time but I was in New Jersey and watched some men cutting asparagus in a field By the time the asparagus was cut until it was finally moved onto a truck it had been setting around for almost a whole day I thought that a better method could be found to handle it so I came back home and began to raise some myself," recalls Cope

That small beginning has mushroomed into an estimate that this year Cope's will process over 80,000 pounds of asparagus

"And we could handle more I was thinking about planting some more acreage this year but I am getting a little older now and I'm not sure that I want to expand the business any further," said Cope

It takes from three to five years to get into the production end of the asparagus business It takes at least three years for the crowns and roots to mature and then another year or two for the stalk to grow to harvest size

Once the crop is cut it is brought quickly to the processing plant "We once had a saying," Cope said, "The sun never rises on Cope's asparagus on harvest day That is, we would have the asparagus cut before the sun came up and into the processing plant as early as possible Now that we have grown larger we can't make that claim any more But we make every effort to get the asparagus into the plant as quickly as possible It can't be left to sit around "

The key to good asparagus is fast processing Once it arrives at the processing plant it is unloaded onto a conveyor belt which takes the asparagus through a wash cycle Then it is taken inside for sorting and sizing There are about twenty-five or so employees at the Cope processing plant They receive the asparagus and then prepare it for either fresh packing or freezing

"We were one of the first companies to use polyethylene bags in packaging our fresh asparagus," notes Cope proudly The asparagus, before it is packaged, is sized and only the larger spears go to the consumer The tips and cuts are generally used in the frozen food end of the business

These long stretches of tobacco muslin Thursday revealed the push of young plants underneath, but also showed that the tender tobacco plants have a long way to go before they can be planted on Memorial Day, or soon thereafter. The corn planting is going very slow due to wet conditions under the topsoil. However, reports are good that much corn should start going in today.

Farm and Home Foundation Awards Ten Scholarships

Ten Lancaster County High School seniors each received $400 agriculture and home economics scholarships this week The scholarships were announced at a meeting of the Farm and Home and Home Foundation Tuesday night to the following·

Cynthia Lou Binkley, daughter of Mr and Mrs Richard B. Binkley, 16 South Fulton Street, Strasburg, Lampeter-Strasburg High School, who plans to attend Mansfield State College

Omaha Cattle

Thursday, May 11

Slaughter steers fully steady. Heifers strong to 25c higher. Cows 25-50c lower in slow trade most of week but improved action late. Bulls steady. Yearling feeder steers and heifers fully steady, fleshy two-way steers weak.

Four day receipts 19,000 as compared 19,400 previous week and 20,100 year ago. Slaughter steers approximately 40 per cent, heifers 41 per cent, cows 8 per cent, feeders 7 per cent. Stability and good demand were major characteristics of the fed cattle trade during the week under review. Live prices weakened only slightly the fore part of the week under the influence of a bearish carcass trade, and late trading was active with all buying interests aggressive for numbers. Most had entered the week without large live inventories on hand. Heifers were in particularly broad demand. Well-finished 1200-1300 pound steers usually found reliable outlet, but best inquiry was generally on Choice 1050-1150 pound weights which would produce a carcass under 700 pounds.

Slaughter Steers: Five loads High-Choice and Prime 1185-1373 pounds 3-4 35.85-36 00, moderate volume same grade 1094-1363 3-4 35.50-35.75 during week. Choice 975-1275 closed 34.50-35.50, load mostly Choice 1425 pounds 4-5 34.10. Mixed Good and Choice 950-1225 34.00-34.50, occasionally 34.75. Good mainly 32.50-34.00, Holsteins 2-3 31.50-31.75. Standard and Low-Good 30.50-31.50.

Average cost slaughter steers first three days 34.83 average weight 1144 pounds as compared 34.68 and 1144 pounds previous week 32.58 and 1135 pounds year ago.

Slaughter Heifers: Two loads Prime 1049 pounds 3-4 35.75, moderate number High-Choice and Prime 950-1100 3-4 35.25-35.50. Choice 825-1050 2-4 closed 34.00-35.25. Mixed Good and Choice 750-1000 33.50-34.25. Good 30.00-33.50. Standard and Low-Good 28.50-30.00.

Cows: Utility and Commercial mainly 24.00-25.50, few Utility Dairybreds 25 75-26 00. Canner and Cutter 21.50-24.00, Mixed Cutter and Low-Utility 24.25-24.50. Shelly Canner 19.00-21.00

Bulls: Utility, Commercial and Good 27.50-31 00, Commercial 1-2 31.25-31.50. Cutter and Low-Utility 24.00-27 50.

Feeders: Outshipments around 1,500 little different from previous week, large share two-way steers, but moderate number yearling heifers and few lots yearling steers. Yearling steers and heifers fully steady, fleshy steers weak.

Two loads Choice 570-579 pound steers 41.00-43.00, load Good and Choice 583 pounds 36 00. Several loads Choice 940-1036 35.00-35 25, High-Good and Choice 926-1137 34.00-34.75.

Several strings Choice 537-654 pound heifers 36.50-39 50, High-Good and Choice 674-850 32.50-34 50.

Futures Trading

(Closing bids as of Thursday, May 11)

	Chicago Cattle	Chicago Hogs	New York Maine Potatoes	Chicago Fresh Eggs

New Holland Dairy Cattle

Wednesday, May 10

Reported receipts of 121 cows, 22 heifers and 3 bulls; market steady with last weeks market.

Two loads New York State and Canadian cows, 420-800.

Canadian cows, 400-550.

Special consignment of Red and White heifers, 460-800.

Local cows, 325-675.

Holstein springers, 350-510.

Holstein open heifers, 190-300.

Bulls, 250-425.

Broiler Chick Placement Drops

Broiler chick placement in Pennsylvania dropped sharply last week to the lowest total in three months, according to the Pennsylvania Crop Reporting Service.

The starting of just 1,144,000 chicks on the 9-11 week feeding cycle was four per cent below the previous report and down 11 per cent from a year earlier. The current 10-week average of placements continues to drop over the same period in 1971, now down three per cent.

Although the setting of eggs for broiler-type chick hatch continues to run high it does not appear that it will improve the Commonwealth's broiler production position. Much of the hatcheries production is shipped out of state.

The current 10 week average of shipments of broiler chicks out of the state is up to 22 per cent of the 10-week average of placements within the state and on the increase. These outshipments are now running 47 per cent ahead of last year.

More Food Uses for Animal Fats Promised

A fat with the properties of more expensive imported fats used in confections is one of the potential products made possible by the fractionation of tallow, USDA scientists reported.

Tallow (beef fat) has been separated by this process into three fractions which at room temperature are hard solid (15 per cent), plastic solid (20 per cent), and liquid (65 per cent).

The plastic solid fraction is compatible with cocoa butter, and has one of this imported fat's most valuable properties-it remains solid at room temperature but melts at body temperature. Candy coatings made with such a fat melt in the mouth without leaving a waxy sensation. It also shrinks when molded, another advantage in candymaking

A paper describing the tallow fractionation and suggesting potential uses for the three fractions was presented before a joint meeting of the American Oil Chemists' Society and the Japan Oil Chemists' Society. The paper was prepared by F.E. Luddy, J. W. Hampson, S.F.Herb, and Dr. H. L. Rothbart, research chemists at the Eastern marketing and nutrition research laboratory of USDA's Agricultural Research Service (ARS) in Philadelphia.

Experiments are now underway to explore the utility of the other two fractions of tallow produced by this process, the liquid and hard solid fractions. The liquid fraction has properties that suggest its application as a salad or cooking oil. There is also the possibility that the solid and liquid fractions might be blended together (or that the solid fraction might be blended with another oil) to make plastic shortenings or margarine-like prodcts. Such products could be useful for specialty food uses, where particular physicochemical properties could be provided as required by controlling the proportions of each fraction used.

Laboratory-scale fractionations lead ARS chemists to believe that the process could be carried out economically on a large scale. Commercial fractionation of tallow could have important economic implications for the livestock industry.

Between five and six billion pounds of beef fat are produced annually in the U.S. Most of this is potentially edible, but only about a tenth of it now goes into edible products, mainly shortenings and spreads. The rest is diverted to "inedible" tallow markets, and about half of this is exported.

By opening up new markets for edible tallow, this process could improve the livestock industry's return on this byproduct. Furthermore, specialty fats derived from tallow as a result of fractionation should command a higher price than even today's edible tallow.

Work is now in process to improve the tallow-fractionation process. In the meantime, the products of the fractionation are being evaluated for further commercial exploitation.

Farm Vacation Directories Ready

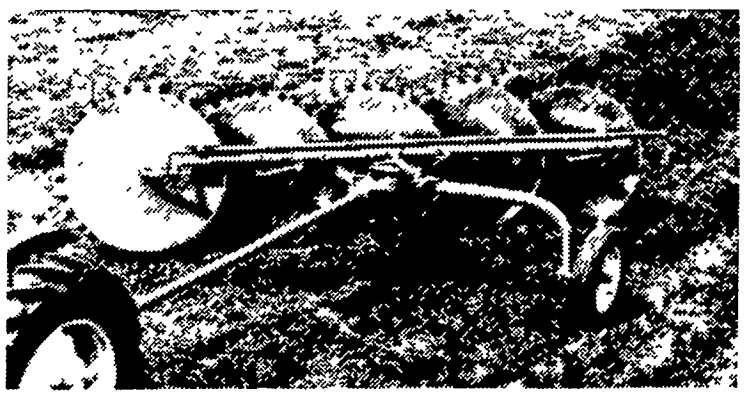
Directories of farms which take vacationers are being distributed by the State Agriculture Department.

The directories, published annually by the Department, list 81 farms accepting guests. American plan prices for vacationers range from $45 to $85 weekly per person; prices for children are lower.

Vacation farms offer a variety of conveniences Attractions include swimming pools, fishing ponds, stocked trout streams, hay rides, square dancing, boating and tennis. Vacationing children will find cats, calves, chickens, colts, goats, horses and beef steers on most farms. Many of the farms invite guests to help with chores such as gathering eggs, milking cows and picking fruit.

Directories can be obtained by writing to: Farm Vacations, Pennsylvania Department of Agriculture, 2301 N. Cameron St., Harrisburg Pa. 17120 or Travel Vacation Bureau, Pennsylvania Department of Commerce, Harrisburg, Pa. 17120.

Speed wheel rake gets hay fast . . . gets it clean!



Use the Avco New Idea Speed Wheel Rake over any terrain — smooth, uneven, hilly or contoured — and it gets the hay other rakes miss . . . and gets it fast. Raking wheels feature independent spring counter-balancing so teeth follow ground contour. Gentle action builds big fluffy windrows without shattering valuable leaves. You can use the basic 5-wheel rake (8' 4" width) for the first cutting, then add 6th or 7th wheel for later cuttings. Stop in and see this low cost rake for yourself!

TIRED!!

Are you just a little tired of milk replacers that won't mix well, that won't stay in suspension, that settle out?

Read what Paul Miller, respected Holstein breeder of Linglestown RD4, Pa. has to say . . .

"I like Pioneer Vig-R-Calf because it starts my calves off fast and keeps scours at a minimum."

And Mrs. Earl Hadley, Bedford, Penna. . .

"Having used other milk replacers, found Vig-R-Calf to be more like cow's milk, in both building better calves, and eliminating other troubles."

And Donald Walker of Berlin, Pa. . . .

"I have fed another make of calf starter and milk replacer for a good many years, but I found that Pioneer Vig-R-Calf and calf starter, much more appealing, and the calves do much better on it."

You can get performance like this, with a product that many users don't mix at all. Just put the powder in the bucket and pour the water on top. Try it for yourself and see the difference.

Agrico TCF™ for corn has what it takes for bigger, better yields

Agrico TCF stands for Total Crop Formula . . . and that's what it is . . . a special, advanced fertilizer for corn that supplies all the essential N-P-K, plus the secondary elements and micronutrients, your corn needs for extra yields, better quality.

Because Agrico TCF for Corn is formulated to meet the specific nutrient requirements in different farming areas, your corn is assured of fast starts, that will produce thicker, more uniform stands. The special formulation of secondary elements and micronutrients supplies the vitality needed for mid-season growth and for early, uniform maturity that makes harvesting easier. All this adds up to more profit for you.

Remember, it takes more than Nitrogen, Phosphate and Potash to increase corn yields and quality . . . and Agrico puts what it takes in TCF for Corn . . . the right balance of secondary elements and micronutrients. See us today for the Agrico TCF for Corn formulated for the needs of your soil.

Renovate your vacation cottage for rental ☐
Take a second honeymoon ☐
Add a wing to your factory ☐
Remodel your store front ☐

When opportunity strikes.

Buy art for investment and pleasure ☐

Install central air conditioning ☐
Repair and paint the barn and outbuildings ☐
Refurnish your offices ☐

Pay for your youngsters braces ☐
Clear up old bills ☐
Build a swimming pool ☐
Convert the barn to apartments ☐
Expand your factory ☐
Take better pictures with a better camera ☐
Tell the tree surgeon to fix 'em up ☐
Mend your fences ☐
Buy a new car now before prices go up ☐
Add a pool heater for more swim days ☐
Redo a bathroom—or two ☐
Send your kids to camp ☐
Buy additional equipment to fulfill a business order ☐
Invest in trees and shrubbery ☐
Buy antiques to start a business ☐
Upgrade your wardrobe—and the family's ☐
Buy a travel camper ☐
Install a patio with a gas grille ☐

Borrow for school or college tuition ☐
Pay your taxes without late penalty ☐
Buy a sewing machine and sell what you make ☐
Get yourself that motorcycle ☐
Buy the tools to turn your hobby into a business ☐
Panel the basement or the garage ☐
Take flying lessons ☐
Convert your garage to a bedroom ☐

This could change your life.

Get a color TV or an extra set ☐

Give your daughter that horse ☐
Borrow against your slow-pay receivables ☐
Buy an antique car or fire engine for investment ☐
Turn part of your house into a profitable apartment ☐
Buy power garden tools and raise vegetables ☐
See the U.S.A. in a motor home ☐
Buy that motorboat ☐
Relocate your company's offices ☐

This could make for a happy wife.

Remodel the kitchen, pots and pans and all ☐
Go to cooking school ☐
Re-roof the house—and insulate it, too ☐
Borrow against your future crops ☐
Finance your invention ☐
Install a new heating system ☐

Enjoy a garden tractor and mower ☐

Have a fireplace built . . . or do it yourself ☐
Repave the driveway ☐
Buy a newer used car (or a second car) ☐
Buy skiing equipment off-season, and save ☐
Teachers: borrow to travel abroad this summer ☐

☐ Buy a sailboat you can weekend on
☐ Finance a company aircraft
☐ Buy a tuxedo (and get her an evening dress)
☐ Install a home intercom system
☐ Go to Europe—with the children
☐ Go to Europe—*without* the children
☐ Build a cabana for the pool
☐ Add a bathroom in the basement
☐ Get new tires for the car
☐ Buy a piano or organ
☐ Take an extra week's vacation this year
☐ Get an electric dishwasher
☐ Send your youngster to summer tech school
☐ Get a tent, camp stove and sleeping bags
☐ Buy new machinery for your plant
☐ Get a great summer deal on a snowmobile
☐ Improve your ham radio rig
☐ Enclose your porch
☐ Landscape the garden

Hmmmm...

☐ Buy your son an electric guitar

☐ Soundproof the rec room (it figures!)
☐ Build a tennis court—and light it
☐ Construct a gazebo
☐ Get a good stereo with a tape deck
☐ Redo the dining room
☐ Train for a second job (or a new occupation)
☐ Buy a first-class rooftop TV antenna
☐ Rewire your home for 100-amp service
☐ Try canoeing—great, quiet exercise
☐ Take some college courses
☐ Treat the family to bowling balls, bags, shoes
☐ Buy building lots for resale
☐ Install aluminum siding
☐ Buy up a complete collection of something

A rare one these days.

☐ Start an advertising campaign for your business
☐ Go hunting in Alaska
☐ Open a branch office
☐ Build separate quarters for your mother-in-law
☐ Buy new fly rod and waders for trout season
☐ If the car runs better than it looks, repaint it
☐ Re-seed the lawn
☐ Get an air-conditioned car . . . or add it to the car you own
☐ Beautify your company's building and grounds
☐ Buy an electric typewriter
☐ Buy a retirement home or lot
☐ Build up your rare book collection
☐ Have cash on hand for country auctions
☐ Give your daughter a great wedding
☐ Raise cattle, sheep or hogs
☐ Repaint and re-outfit your boat
☐ Buy new golf clubs and bag

Inspired!

Your mother would be proud.

☐ Get a really good home movie outfit in time for this year's vacation

☐ Buy a water bed
☐ Go fishing in Canada
☐ Get a new shotgun and outfit to match
☐ Install a master bedroom bath
☐ Get new office equipment
☐ Build a basement darkroom for your family movies
☐ Enjoy the bike craze—with your whole family
☐ Paint the town house red
☐ Buy an encyclopedia set
☐ Do anything you want that we've forgotten

From Local Ag Teachers:

Thoughts in Passing

The article this week was prepared by Donald Robinson, Young Farmer advisor in the Eastern Lancaster County School District.

OUTDOOR RECREATION ENTERPRISES

As the weather changes from Winter to Spring the farmers thoughts turn to working his fields, but for millions of Americans, thoughts turn to planning vacations or having an enjoyable drive in the country.

What do these two thoughts have in common? - faamers may have what vacationers want-but neither knows it Have you ever considered developing a vacation farm, youth camp, golf course, swimming facility, picnicking and sports area, camping area, nature trail, riding, fishing and hunting facility, winter sports area, or some other recreational facility? Before you say it couldn't be done on your farm, read on

This short article cannot provide all the information you need to develop a recreational facility but it can provide some thoughts for you to analyze the possibilities

Three ingredients are necessary to any successful outdoor recreation enterprise resources, management, and location Resources are those areas that have natural or developed facilities that will bring enjoyment or relaxation to people Income producing recreation opportunities may crop up in the most unexpected places. For example, one farmer was about to tear down an old smoke house and spring house, instead he decided to restore them as a tourist attraction and

Donald Robinson

charge admission to come in and look them over It happened to be near a main highway so it developed into a thriving recreation business.

Another farmer put up a sign "$1 to see the cows milked" and soon found he had to buy more cows to fill the demand (Continuous milking isn't the best way to develop a milk cow, of course, but the viewing may bring better returns than the milk).

The point is that not all recreational resources need to be spectacular "Beauty is in the eye of the beholder" they say So also it might be said, "Recreation opportunity is in the eye of the imaginative developer"---within limits. Which brings us to the next factor

Management covers many items such as aptitude, imagination, financing, and labor It is the proper blend of many ingredients. Aptitude is possibly the most important single component of any recreational enterprise. To be successful in recreation one must like people in general well enough to put up with their foibles, moods, and sometimes annoying habits. He must look after their comfort He must, in short, keep his customer's interest uppermost in his plans at all times.

A person with imagination can make up for deficiencies in natural resourses. One commonly thinks water and trees or both are necessary for a successful recreation enterprise, but think of the example of the smoke house. Every farmer and farmer's wife has a limitless store of interesting and entertaining information that can be the delight and an education to people brought up in the city.

Financing. A few people have founded successful recreational businesses on a shoestring, but more have failed. In this field, even more than in farming, it is necessary to have good arrangements for adequate financing.

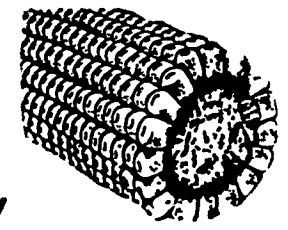
Labor. A farm family adding a recreation enterprise to its agricultural operations often tends to overlook the amount of time and energy that must be allocated to the recreation portion. Many times the individual entrepreneur is in a situation where service is the most important product he has to sell because service may not be available in a public facility nearby. In respect to labor, recreation may be an answer to the problem of underemployment brought about by a farmer's inability to acquire sufficient land to bring his unit up to adequate size from a labor utilization standpoint.

Location is always of importance in an industry such as recreation. Since we are already in a high tourist attraction area, this should be beneficial to a recreation type of enterprise, and would not need to be developed as much as in other areas. But as stated in the beginning, you have what vacationers want. If you want to take advantage of that you need to develop your facilities to harvest that particular crop and let them know that you have it available.

Ham Insurance

A large canned ham in the refrigerator is especially valuable company dinner insurance in the summer when parties are often spontaneous and relatives or friends may drop in unexpectedly. A ham can be kept unopened in the refrigerator for several months. What if company doesn't materialize? No problem — that ham will make a fine family meal with leftovers for satisfying salads and hearty sandwiches.

More farmers each month prefer to buy their



- EAR CORN
- HAY
- STRAW

from us for better value and all around satisfaction. At farm or delivered, any quantity as your requirements may be.

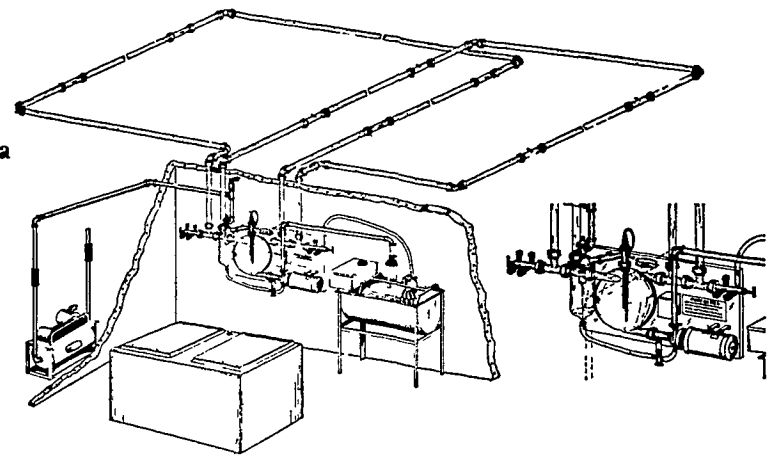
AGWAY

STA-RITE Can Put A Pipeline In Any Barn

WHY BUY A PIPELINE?

For An Average 40 Cow Herd You Can . . .

1. Save walking 100 miles a year.
2. Save carrying 292 tons of milk a year.
3. Save 200 hours per year on an average herd.
4. Produce higher quality milk.
5. Increase your milk production.



WHY BUY A STA-RITE PIPELINE?

1. Engineered for the modern dairy farm of today as well as the dairy farm of tomorrow. Around the barn pipelines and milking parlors.
2. The only milkhouse control unit that is assembled at our modern new factory on a stainless steel panel. Pretested for trouble free operation, self-draining with patented washing features.
3. Built and guaranteed by Sta-Rite Industries, Inc., of Delavan, Wisconsin, a recognized leader in home water systems and agricultural components.

Twin Valley Chapter Installs New Officers

The Twin Valley Future Farmers of America held its regular monthly business meeting recently in the vocational agriculture classroom.

Nevin Mast was installed as new president by Frank Stoltzfus, out-going president. Terry Murray was installed as vice-preisdent, Beth McDonnell as secretary, Bill Ford as treasurer, Thomas Carskadon as reporter, Robert Stoltzfus as photographer.

The Chapter voted to serve as waiters for the sports banquet as requested by Mr. Arnold, advisor of student council which sponsors the sports banquet.

The Chapter also discussed having a chicken barbecue during the summer for FFA members, parents, and guests. This motion was referred to a committee of three: Terry Murray, Jeff Gabel and Lloyd Simmers.

Also mentioned was the Practical Arts Exposition which was held May 10 in the Twin Valley gym. All areas of the Practical Arts Department had exhibits.

Terry Murray reported that Ira Nissley will help sponsor the Twin Valley Pumpkin Growing contest for elementary students.

Nevin Mast particpated in the Eastern regional FFA public speaking contest at the Lehigh County Vo-Tech School at Schnecksville. He placed fifth out of 12 speakers from the 19 counties in Eastern Pennsylvania.

Twelve FFA members participated in the Berks County FFA land judging contest at Sheerlund Forests. The Chapter team placed fifth out of eight teams competing None of the Chapter members finished in the top 10, but all participants learned more about the soils of Berks County.

The Chapter is helping to establish an Environmental Education Area on about 40 acres of ground owned by the High School.

Chapter Reporter.
Thomas Carskadon

Source of Stimulant

The foxglove is used in the treatment of heart disease. The flower is a valuable source of the powerful heart stimulant, digitalis.

Research Programs Realigned

An organizational realignment that greatly reduces the number of lines of supervision at research field locations and, at the same time, provides for strong national research planning, was announced by T.W. Edminster, administrator of the U.S. Department of Agriculture's Agricultural Research Service (ARS).

A research operation staff, located primarily in the field and headed by four deputy administrators, will carry out the agency's research at its present 210 locations throughout the U.S. Designated as acting regional deputy administrators are Dr. Steven C, King, Northeast region; Earl R. Glover, North Central region, Dr. A.W Cooper, Southern region, and Dr. H Rex Thomas, Western region. Pennsylvania is included in the Northeastern region

The national program staff, headed by four assistant administrators, will be located at the Agricultural Research Center, Beltsville, Md This staff will function as a mechanism for policy and program development, review, and evaluation on a national basis It will concentrate upon insuring the proper interaction, balance, and distribution of research effort. The assistant administrators will work closely with the regional deputies and with other ARS research leaders.

Named as acting assistant administrators are Dr. Paul D. DeLay, animal science; Dr. Hugo O Graumann, plant science, Carl W Carlson, soil, water, and air research; and Dr. Fred R Senti, marketing, nutrition and engineering science.

In announcing the new organization, Edminster noted that the four regional deputies will have major responsibility for the implementation and operation of research programs within their geographic areas He further pointed out that "They will be close to the work, close to the problems, and close to our key cooperators in the State agricultural experiment stations and in industry"

The move will also reduce present multiple lines of supervision to a single supervisory line and will permit reductions in administrative overhead

FORD

535 MOWER-CONDITIONER $2,200.00

- Cuts, conditions, windrows in one trip.
- Saves time, fuel and effort.

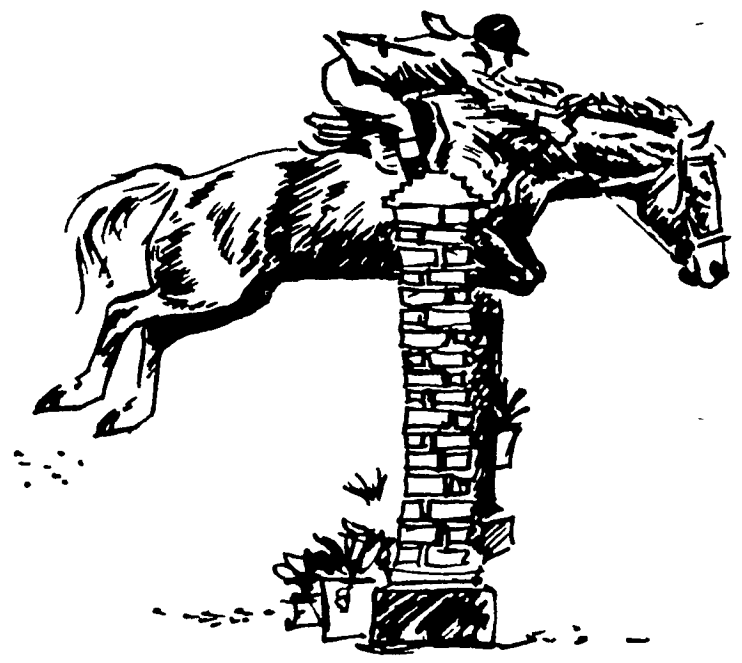
HELP 'EM PERFORM...



...feed OMOLENE®...

Let's take a look at OMOLENE, probably the most popular ration with top horsemen everywhere. OMOLENE is a "coarse" ration. That is, it's not pelleted. It can be fed with good hay or pasture, and is formulated to adequately supply the nutritional needs of normal horses.

OMOLENE has a high energy level, which is most important. The more a horse works, the more energy he requires. OMOLENE is always Micro-Mixed with the very best ingredients available. This exclusive mixing process makes for one of the most perfect blending of ingredients to be found anywhere. OMOLENE is meant to be fed right from the bag, so there's no need to throw off its *researched* nutritional balance by adding oats or other grains.

OMOLENE will give your horses exceptional show bloom. It will truly "slick them up", and it's *uniform* . . . the high quality is in the handy 50 pound paper bag no matter whether you buy it at our store or in "Squedunk."

PURINA CHOWS®

Certainly Lasso® gets all kinds of foxtail:

Yellow. Green. Giant.

Control three foxtails for the price of one. Apply Lasso in corn or soybeans and get 'em all. Plus lots of other grasses like crabgrass and fall panicum. And broadleafs like pigweed, too.

In short, no matter which foxtails have been your problem weeds, get rid of them (and a lot more) with Lasso.

That's what you expect from your herbicide.

Mother's Day, May 14th

We still have today to go out and get something special for Mother For tomorrow we once again will pay tribute to that wonderful symbol of security and understanding -- Mother!

It was Amos Bronson Alcott, the father of four daughters so quaintly and endearingly pictured in his daughter's novels, who said "Where there is a Mother in the house, matters speed well" The statement must have been particularly applicable in the Alcott household, for the father was more visionary than practical and matters would have been perpetually at loose ends had it not been for the good sense of the wife and mother But he spoke a truth that is universally applicable, it is indeed a sorry house where there are children and no mother

Mother is the symbol of security and understanding If the truth were told that is the reason that Mother's Day is celebrated We love our Mothers sometimes for their other memorable traits, but in the main our thoughts go back to the time when they were our shield against a cruel and baffling world, when they understood what no one else--father, brother, sister, grandparents or beloved friend-- was able or willing to understand.

On the basis of the security and understanding which awaited one upon his arrival at his Mother's door it became possible to go ahead in the rough world encompassed by the backyard, the house next door, the playground and the school room Through her understanding it became possible to understand others and thus to take one's own place in the world.

Another American man of letters said, "The Mother's heart is the child's schoolroom." It is possible that if all the education a child receives were totalled up as to its sources, the sum in the column headed "Mother" would be the greatest. There are so many things a child has to "know," so many things he asks, so many things he accepts from the lips, the direction, the attitude and the example of his Mother These are the things he takes through life with him.

There was a line in an old play which ran: "The Mother in her office holds the key of the soul, and she it is who stamps the coin of character, and makes the being who would be a savage but for her gentle cares, a Christian man! Then crown her Queen of the World."

It's Dairy Princess Time

Young ladies in Lancaster County who are on dairy farms, have completed their junior year in high school and are under 21 years of age, who are single and never married, should seriously consider entering the 1971 Lancaster County Dairy Princess pageant, which will be held June 15 at the Farm and Home Center

Dairying is Lancaster County's largest farm income producer, accounting for nearly one-third of gross farm income.

The Dairy Princess Contest is one way for the local farm community to advertise its most important farm product. In today's highly competitive world, it is vitally important that farmers keep the general public alert to their existence and their needs.

Any appeal to young women to enter the contest, however, should not be based on milk industry needs It should be based on the young woman herself and what the contest can do for her

Not only does the contest offer the opportunity for many material rewards, more importantly it offers young women experience which money can't buy - an opportunity to meet people and to develop their own personalities and character. In this regard alone, every contestant will be a winner.

The ability to appear in public with confidence is to be highly prized. And the young woman who assures herself she couldn't possibly face it is the one who most needs to enter the contest. She might surprise herself and win And if she doesn't win, what has she lost?

It's time to pick up the challenge again by contacting Mrs Robert Gregory, Box 248, Lititz RD1, 733-7584, or the Extension Office, 1383 Arcadia Road, Lancaster, 394-6851, or any committee member. Deadline is Friday, May 26

NOW IS THE TIME . .

By Max Smith
Lancaster County Agent

To Control Weeds

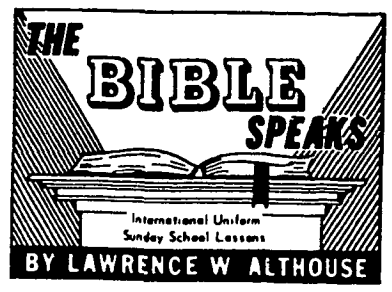
The control of weeds is everyone's responsibility and has been a problem throughout the history of our country. A weed has been described as any plant that is out of place and unwanted. Alfalfa in a corn field is a weed to the corn grower, but not as serious as many of our common weeds that are allowed to grow and mature. I can be especially critical of land owners with idle land that permit all of their vegetative growth to grow wild and pollute the neighborhood with weed seeds and with pollen. Real estate developers and contractors are often guilty of doing nothing with their weeds until a neighbor complains and get local authorities to mow the weeds. The best control is to have the area sprayed during the month of May and not permit the weeds to grow and develop seeds. Township supervisors are urged to adopt weed ordinances and enforce them in order to stop this nuisance. Why should this beautiful Garden Spot county be dotted with uncontrolled weed growth and development?

To Beware of Poisonous Weeds

Livestock producers are urged to beware of the large number of poisonous weeds and plants that may be in the pasture area. This is particularly true in woodland areas. It is hard to understand how some animals will crave these plants and consume all they can find, while lush grasses are allowed to go uneaten. The presence of wild cherry trees in a pasture is a warning that if the limbs are broken off or the tree blows down during a wind storm, the wilting or the wilted cherry leaves are poisonous. Owners should make frequent inspections of their fields during the pasture season.

To Wilt Forage Crops for Silage

The cutting of forage crops for hay or silage will soon compete with corn planting chores if the weather continues to be wet. Any forage crop may be made into silage, as well as into hay, providing the farmer can use the silage to an advantage. In most cases more feed nutrients will be preserved if the crop is made into silage rather than trying to fight the weather when making it into hay. The proper stage of maturity is very important when knowing when to cut the crop; in many cases the forage is allowed to get too ripe before being cut. When making into silage it is very important that the crop be conditioned (crimped or crushed) in order to expedite the removal of the excess moisture in the field. A wilting period should follow the conditioning so that the quality of the silage will be better; direct-cut forage usually ends up with dark-colored, strong-flavored silage. Wilting down to the 60 per cent moisture level is suggested for best results in most silos. When allowed to get below this moisture figure field losses are higher and more heating occurs in the silo; when this happens less of the protein is digestible. Careful supervision of the wilting time is necessary in order to get top quality silage.



YOU, THE PREACHER

Lesson for May 14, 1972

Background Scripture Luke 4 16 21, Romans 10 14-18, Ephesians 3 7-13
Devotional Reading Ephesians 3 7-13

"The best way to revive a church," said evangelist Dwight L Moody, "is to build a fire in the pulpit"

Sometimes building "a fire in the pulpit" does more than reviving a church; it may also renew a community or even a whole nation There are many evidences in in the Old Testament of the far-reaching effects of proclamation by the prophets of Judah and Israel

Rev. Althouse

There are more contemporary illustrations available to us, too A little more than a century ago, Alexis de Tocqueville, a French writer, visited our nation and made this observation

I sought for the greatness and genius of America in her commodious harbours and her ample rivers, and it was not there, in the fertile fields and boundless prairies, and it was not there. Not until I went into the churches of America, and heard her pulpits aflame with righteousness, did I understand the secret of her genius and power.

Proclaiming the good news

Think of how the preaching of Jesus changed, not only Judaism, but the world as well. Jesus saw in himself the fulfillment of Isaiah 61:1, 2:

The spirit of the Lord is upon me, because he has annointed me to preach good news to the poor. He has sent me to proclaim release to the captives and recovering of sight to the blind, to set at liberty those who are oppressed, to proclaim the acceptable year of the Lord.

St. Francis of Assisi one day said to another monk, "Brother, let us go down into the town and preach." So they set off for town, conversing as they went. When, at last they had walked through the length and breadth of the town, the other monk inquired, "Father, when shall we begin to preach?" "My son," replied St. Francis, "we have been preaching; we were preaching while we walked We were observed by our fellows, our behavior has been remarked, and thus we have delivered a morning sermon My child, it is no use that we walk anywhere unless we preach as we walk"

Preaching as we walk

One does not have to mount a pulpit in order to proclaim the Good News There are a number of men and women in my church who preach from the pulpit when I am absent—and very convincingly at that—but their words from the pulpit would matter little if they were not equally convincing in the silent preaching they do in their everyday walk through life

Bulletin Available on Genital Abnormalities

Dairy heifers unable to conceive after four or more breedings may be restricted by genital abnormalities, experiments at Pennsylvania State University indicate. Such genital abnormalities account for 10 to 20 per cent of the failures of conception, according to Dr. T.Y. Tanabe and Dr. J.O. Almquist, dairy physiologists with the Agricultural Experiment Station at Penn State.

The experiments analyzed the incidence, type, and severity of abnormalities of the reproductive system among 180 subfertile dairy heifers which had failed to conceive after repeated breedings

Results of the studies are published in "Gross Genital Abnormalities," a bulletin gaining an international reputation for thoroughness of subject matter and high quality of color illustrations Requests for "Gross Genital Abnormalities" have come to Penn State from many parts of the world

The bulletin features 24 color plates showing various genital abnormalities Cooperating on the project at Penn State were the departments of dairy science, bacteriology, and veterinary science.

The publication is available for $3.00 plus 18 cents state sales tax from Box 6000, Pennsylvania State University, University Park, Pa. 16802.

In addition to the Penn State findings, "Gross Genital Abnormalities" reviews most of the research reports dealing with reproductive abnormalities in dairy cattle in the United States and foreign countries since 1924.

McElwrath FCIC Deputy Manager

David W. McElwrath of College Station, Texas, has been appointed Deputy Manager of the Federal Crop Insurance Corporation (FCIC), U.S. Department of Agriculture.

As FCIC deputy manager he will help supervise the program which indemnifies Federally insured farmers whose crops are damaged by weather, insects, and disease The program pays indemnities from premiums received from farmer-policyholders

Pa. States Position on Hog Cholera Outbreaks

The Pennsylvania Department of Agriculture has put all other states on notice that it will be redoubling its efforts to ensure the swine industry within the Commonwealth is not threatened by recent outbreaks of hog cholera.

Secretary of Agriculture McHale has approved new standards for permitting shipments of swine from the affected areas—North Carolina, Georgia, South Carolina, Texas and New Jersey.

E. V. Jeszenka, V.M.D., director of the Bureau of Animal Industry, has notified the chief livestock sanitary officials of all states that feeder swine—those destined for immediate slaughter—will not be permitted into the Commonwealth until all quarantined areas within an affected state have been released.

Breeding stock are permitted more freedom of movement. They will be allowed into the Commonwealth from an affected state provided they are shipped directly from the farm or a recognized breed sale and are accompanied by an interstate health certificate.

Pennsylvania is one of 41 states that have been approved hog cholera-free having received the recognition on July 19, 1971.

Four of the five states reporting recent outbreaks of hog cholera had been free of the disease for periods of four months to two years indicating that hog cholera can remain undetected in a herd or can reappear when the animals are fed raw pork scraps or uncooked garbage.

Markings, Not Sex

The name "tabby" refers to the markings on a cat and does not mean that the cat is a female The striped tabby is the oldest type of cat yet discovered

CONTROL WEEDS IN ALFALFA WITH

BUTYRAC-118

Apply 2 to 4 weeks after alfalfa emerges. Controls broadleaf weeds in seedling or established legumes. This remarkable selective action — killing many broadleaf weeds without affecting certain broadleaf crops — has been proven by research men and commercial growers throughout the country.

Melvin S. Mitchell, general sales manager of the poultry division of Victor F. Weaver Inc., on the left, and E. J. Lawless, chief, Poultry and Egg Divion, Bureau of Markets, Pennsylvania Department of Agriculture, on the right, presented the Golden Egg to Warren Royer, second from left, and James Lewis, second from right, owners of the Akron Restaurant.

Seniors in Supermarkets

Shopping needs of senior citizens are getting more attention as the over-65 group has become the fastest growing segment of this nation's population. High on the list is a need for package sizes smaller than the usual family-size prepacks. The one or two-person family also wants to be able to buy two or three pork chops in a pack, a half-pound of ground beef or a smaller package of produce. There are now more than 20 million people over 65 years of age in the U.S.

Certainly Lasso® plus atrazine gets common ragweed and other broadleafs.

Not to mention a lot of grasses, too.

The last thing growers want to see is healthy weeds growing right alongside your corn. Grasses and broadleafs are notorious thieves of nutrients and moisture. Not to mention the problems they cause, clogging up combines at harvest time.

But getting rid of most problem weeds is as easy as tank mixing Lasso plus atrazine. This tank mix controls common ragweed, lambsquarters, smartweed and other broadleafs. Plus grasses like giant foxtail and fall panicum.

So keep the weeds out of your corn. And out of your combine. With Lasso plus atrazine tank mix.

That's what you expect from your herbicide.

Kauffman Bros. Honored

Harry and Ira Kauffman of Kauffman Bros., Mountville, were honored by the farm equipment division of International Harvester Company recently in a ceremony at Harrisburg. Ira (left) received jeweled tie bars and a plaque from J.A. Ingram Jr, dealer development manager, in recognition of their 80-year association with the farm equipment company. Kauffman Brothers was founded in 1892 at Windom, Pa. Ira, a native of Mountville, began his career with the service department in his father's dealership in 1926. They formed a partnership in 1940.

Ladies Day Out

Approximately 125 women attended the annual "Ladies Day Out" program held recently at the Farm and Home Center. The group enjoyed a luncheon and a day-long program of entertainment and education.

Miss Kay Weaver, Quarryville RD2, was selected to represent Lancaster County at the regional talent competition to be held in conjunction with the Regional Ladies Day Out in Reading July 19. Miss Weaver is a vocalist.

Safety posters were also exhibited and may be submitted to the regional competition. Mrs. Robert Kauffman chaired the event with assistance from members of the women's committee.

"Teddy Bears"

While on a hunting trip, Theodore "Teddy" Roosevelt refused to shoot a small bear. C K Berryman, a famous cartoonist, immortalized the incident and toy bears, then new to the market, soon became known as "Teddy bears"

WHAT DOES IT TAKE TO BREAK THE HEAT?

"Dairy scientists at Louisiana State University have learned that cows whose heads are air conditioned produce nearly 20 percent more milk in the summer months than they would normally." (from Chemical & Engineering News, Dec. 21, 1970)

We can't air condition the heads of your cows, but we can insulate your barn, milk parlor, loafing shed and other areas where animals can enjoy comfort from broiling sun and high humidity.

WE INSULATE WITH SPRAYABLE URETHANE FOAM and all we need is a clean, dry and moderately warm surface to apply our foam spray which sets in a matter of minutes.

WE ALSO INSULATE POTATO AND APPLE STORAGE FACILITIES, CHICKEN HOUSES, STEEL BUILDINGS AND WHATEVER ELSE YOU CAN THINK OF.

Sharing ideas on local government issues during a special legislative breakfast at Pennsylvania 4-H Capital Days in Harrisburg Monday and Tuesday are: from left, Nelson Martin, Linda Stoltzfus, Senator Richard Snyder, Carlton Mack, Representative Sherman Hill, David Bitler, and Debra Gregory. The two-day event was designed to give 4-H members a working knowledge of the functions of government which is part of the youth citizenship program. Also attending, but not pictured, was Agnes Gibson, breakfast mistress of ceremonies.

Now you can spray AAtrex from a 2,4-D sprayer.

We're talking about AAtrex® in a liquified form. We call it AAtrex 4L.

It needs no pre-mixing. Just shake and pour directly into the spray tank.

With AAtrex 4L, you need only a minimum of agitation. You can apply it in as little as 10 gallons of water per acre.

And when you do apply it, there's less chance of nozzle and screen plugging.

But the important thing is, AAtrex 4L gives you control of most annual grasses and broadleaf weeds. Foxtails as well as cocklebur, pigweed, velvetleaf, ragweed and smartweed. Even quackgrass, that tough perennial.

Of course, you can weed 'n feed with AAtrex 4L, if you like. Or have your custom applicator do it for you.

Either way, you'll be getting top-notch weed and grass control. With AAtrex 4L.

Geigy Agricultural Chemicals, Division of CIBA-GEIGY Corporation, Ardsley, N.Y. 10502.

Tips on Pictures

There was a time when strict rules governed your choice of pictures and appropriate frames. Today, those rules are nothing more than suggestions or guide lines to the all-important selection of what you like.

Don't be uptight about buying or framing pictures. Mrs. Helen Puskar, Penn State Extension home furnishings specialists, says there are a few tips on framing and pictures which could help

When you select frames, remember that a frame enhances a picture and separates it from its surroundings Select a color for the frame that is a shade slightly lighter than the darkest color in the picture

Since they can be cleaned, frame original oil paintings without glass Keep other works of art which can't be washed or cleaned under glass for protection against dust and atmospheric changes

Mats make small pictures look more important and serve to lead the eye gradually into the picture. As a general rule, mats should not be less than two-and one-half inches at the top and sides, nor less than three-inches at the bottom. Mats can be tinted to pick up a color in the picture. And textured or patterned mats can be used with prints having clean, sharp lines and colors.

There are no set rules on where to hang the framed picture. Combine any number of pictures in a variety of sizes, shapes and frame styles, as long as all of them compose a shape--usually a square, a circle, or a rectangle, that pleases you.

In hanging a picture, a good rule of thumb for a single picture is to hang it with its center just about eye level with a person of average height For a group of pictures, choose a central picture as the key. But, before attaching them to the wall, lay them on a flat surface Move them about Assure yourself of the most interesting arrangement

Generally speaking, a large wall needs a large picture or grouping. A narrow place will hold a vertical picture A wide area needs a horizontal piece of art And a very small picture should be placed in a very small area Or, you could use it in a grouping of pictures to increase its visual weight

Mailbox Improvement Week

"Mailbox Improvement Week", a traditional observance which contributes nationally to environmental quality, will be observed May 15-20.

For many years, the start of Mailbox Improvement Week has served as a signal for special community efforts to encourage repairing, painting, identifying, and other improvements in the security and appearance of about 18.5 million rural and suburban curbline-type boxes.

The observance helps in promoting the security of mail as well as in contributing to the appearance of the boxes, which may often be damaged by the previous winter's weather.

"Mailbox Improvement Week" has been observed for generations, particularly in rural areas and small communities. The effort is still especially important for rural delivery areas because more Americans receive their mail today on rural routes than ever before.

The typical rural mailbox today is a far cry from improvised receptacles used by country dwellers in the early years of rural service, starting in 1896, when old tin cans nailed to trees were early favorites. Today manufacturers, in cooperation with the Postal Service, have developed modernistic designs, suitable for use with decorative posts.

As part of the observance of May 15-20, the Postal Service is seeking community assistance in promoting the campaign and asking all personnel directly involved in rural deliveries to cooperate with householders in making certain their receptacles comply with regulations on such matters as safety and accessibility.

Fix-It Tip

The filter on your air conditioner serves the purpose of keeping dust and dirt off the coils and other parts of the unit. This is a mixed blessing because as the filter fills up with dirt it cuts down on the air that enters the air conditioner. Dirt also causes the refrigeration unit to become overloaded as the air flow is cut down.

Cleaning is an absolute must to keep the air conditioner working properly. Inspect the filters at least once a month, more often under very dusty conditions.

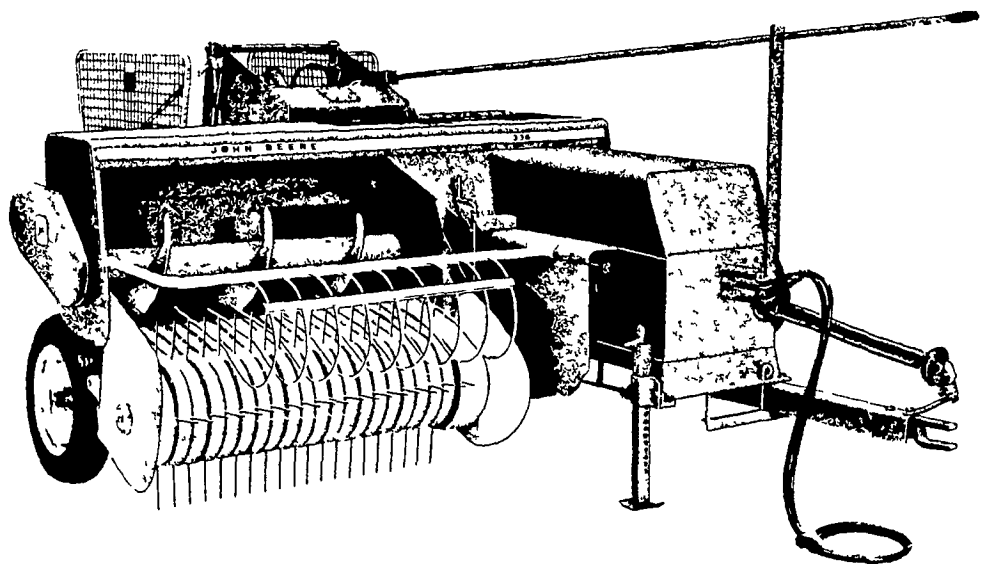
New 336 Baler

makes less noise while it bales more hay



A quick glance reveals clean, uncluttered styling. But good looks of the new 336 Baler goes much more than skin deep.

The striking absence of chain spells quiet operation and low maintenance. The exclusive equal-angle hitch (optional) reduces powerline vibration and chatter and smooths out corners. The V-belt driven pickup and feeding auger, roller-mounted plungerhead, and gear-driven knotter run quietly and require minimum maintenance.

The 61-inch wide pickup with 80 teeth, giant 289-square-inch feed opening, and 80 30-inch-long plungerhead strokes per minute set new capacity standards.

Stop in and see the new 336 now.

ED ESHLEMAN'S WASHINGTON REPORT

Recently, I was able to announce just how much revenue sharing would mean to my District in dollars and cents. The 16th Congressional District will get over $6 million of Federal money if the revenue sharing plan now before Congress is passed.

That's a substantial sum of cssh and goes a long way toward explaining why some of us have long favored this kind of plan for relieving the financial burden of state and local governments. Ever since coming to Congress in 1967, I have viewed revenue sharing as one way of putting an end to the upward climb of state and local taxes. It is these taxes that have become such a problem for Americans, and yet little could be done about the problem until another way of helping finance vital projects at the local level was developed.

Revenue sharing means that states and municipalities will have money available to do things that need doing without having to ask for additional taxes. Federal dollars will be available to meet locally-determined priorities in states, cities, counties, villages, towns and townships throughout the country.

The legislation before the House of Representatives would put no restrictions on how state governments could spend these Federally-shared funds. The states would be free to use the money to meet pressing needs in all fields.

The money channeled to local governments would have certain limitations on how it could be used. Local governments would required to put the shared revenue into law enforcement, transportation and environmental protection programs. They would have rather broad leeway in determining how to best spend their funds within those three areas, but would not have the complete latitude given the states.

One of the chief beliefs behind the whole idea of revenue sharing is that state and local governments are capable of handling the Federal funds wisely and well. Sharing money makes no sense unless problems and priorities can be met better at the state and local level than they can be met from Washington.

Therefore, the real test of revenue sharing will be whether the money is used responsibly by those who receive it. If much of the $5.3 billion that is to be shared nationally ends up being used for mere political gain rather than to meet real needs, the program will be a bust. But if the funds give local areas an opportunity to meet challenges they were previously unable to tackle, then revenue sharing will become a positive means of giving power back to people.

I believe that state and local governments can be responsive. That's why I have supported the revenue sharing concept. But to respond, those governments must know what their citizens need and want. That's why I have supported the revenue sharing concept. But to respond, those governments must know what their citizens need and want. That part will be up to you. And it will be to your advantage to do your part, for if revenue sharing is a success, you may find that your state and local tax bill will become somewhat more realistic.

ATTENTION MR. FARMER!

AGRICO TCF FOR CORN HAS WHAT IT TAKES FOR BIGGER, BETTER YIELDS

Agrico TCF stands for Total Crop Formula . . . and that's what it is . . . a special, advanced fertilizer for corn that supplies all the essential N-P-K, plus the secondary elements and micronutrients, your corn needs for extra yields, better quality.

Because Agrico TCF for Corn is formulated to meet the specific nutrient requirements in different farming areas, your corn is assured of fast starts, that will produce thicker, more uniform stands. The special formulation of secondary elements and micronutrients supplies the vitality needed for mid-season growth and for early, uniform maturity that makes harvesting easier. All this adds up to more profit for you.

Remember, it takes more than Nitrogen, Phosphate and Potash to increase corn yields and quality . . . and Agrico puts what it takes in TCF for Corn . . . the right balance of secondary elements and micronutrients. See us today for the Agrico TCF for Corn formulated for the needs of your soil.

Agrico® Fertilizers

A century of service to grow on

CERTAINLY LASSO® PLUS ATRAZINE CONTROLS FALL PANICUM.

Plenty of growers last season learned that the "foxtail" they thought grew through their herbicide was really fall panicum.

And plenty of growers this season will learn that if you tank mix Lasso plus atrazine, you won't find fall panicum. Nor will you find giant foxtail, crabgrass and most other grasses . . . or lots of broadleafs like smartweed, pigweed, cocklebur.

Lasso plus atrazine gets 'em all in corn.

That's what you expect from your herbicide.

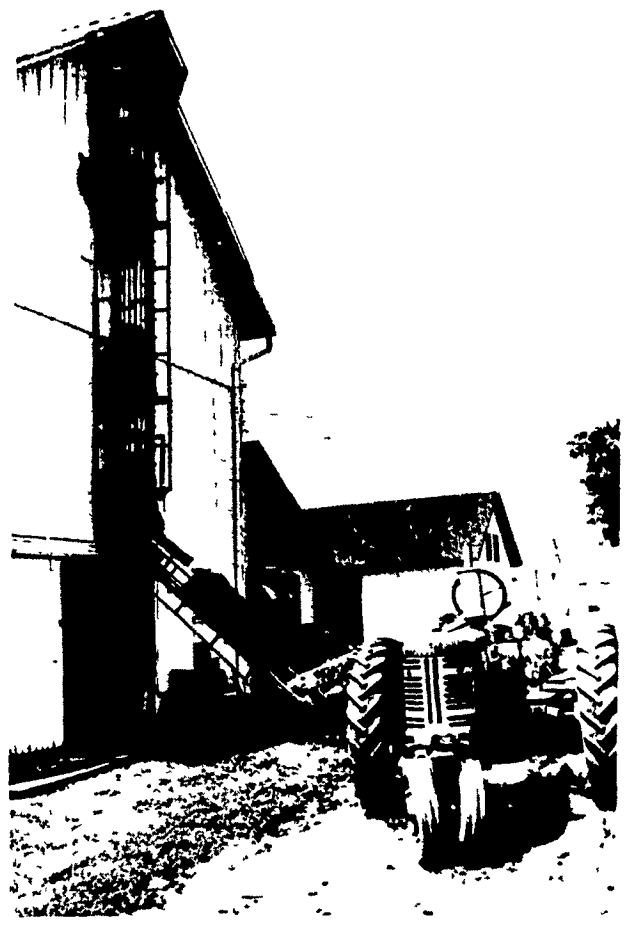
What's New?



Vertical Bale Elevator

A new top drive a new double chain lift, a new bale kicker and a new automatic adjustment that adapts to any weight or size of square bale are improvements available in a new vertical bale elevator announced by Allied Farm Equipment.

The top drive efficiently pulls bales up without extra gearboxes or linkages that require maintenance or repair. The double chain lift grabs and securely holds bales from opposite sides to avoid tearing and broken strings.

The vertical section also automatically adjusts to any weight or size of square bale through a parallel arm system that solves many bale handling problems.

At the top end of the elevator, a new bale kicker, a powered chain, positively turns and starts bales on top the mow section.

The entire system requires no complicated adjustments.

The new Allied Vertical can be used with Allied's Inclined Feeder Section that swings up out of the way or can be easily removed. The entire system attaches to most barns and is available in lengths from 10 feet to over 30 feet.

Mildew Preventative

A "clean" fungicide, Mildew-B-Gone prevents mildew spores from reproducing on virtually any surface found on farms or in homes - wood, concrete, masonry, glass, leather, cloth, tile, canvas.

Mildew-B-Gone works in silos, barns, lockers, greenhouses, basements, bathrooms, clothes closets, boat lockers; directly on clothing, luggage, furniture, shoes, plywood paneling, sports gear and equipment. It is even effective when mixed with paint.

Unlike most mildew inhibitors requiring weekly applications, Mildew-B-Gone provides up to one year protection with one fine spray treatment, as verified by laboratory test. Not only a preventative, it sanitizes and deodorizes to eliminate musty and mildewy odors. No sunning or airing is necessary since Mildew-B-Gone works regardless of temperature and humidity.

A product for the times, Mildewe-B-Gone meets current ecological stadards; is completely biodegradable and harmless to pets. Its non-aerosol formula will not pollute the atmosphere. It is non-toxic, non-inflammable, non-irritating and carries the U.S. Department of Agriculture registration number as an approved fungicide.

Mildew-B-Gone can be sprayed, brushed or wiped on, is packaged in 16-ounce and 32-ounce refill bottles with spray applicators available. Manufacture and unconditionally guaranteed by IBR, Inc., 462 Penn Street, Yeadon, Pa. 19050.

New Electric Chain Saw for Farm Use

A new electric chain saw designed to handle many jobs around the farm has been introduced by McCulloch Corporation.

The new Mini-Mac Electric chain saw weighs under eight pounds without cutting attachments and comes with a factory installed 10-inch bar.

The rugged and powerful Mini-Mac Electric is a precision wood cutting tool and is particularly useful for general maintenance work, pruning trees, and cutting firewood.

The smooth cutting and smooth running electric chain saw is easy to use. Just plug it in, and it's ready to go.

For safety's sake, a thumb activated safety latch prevents accidental triggering. There is also a visual chain oil supply.

The saw runs off of household current. A 2,000-watt or larger generator will run the saw where electricity is not available.

The double insulated saw can use a standard two-wire extension cord.

MR. FARMER!

Are you aware of the latest law concerning Farm Employees? As of May 1, 1972 Pennsylvania Law says that if you have an employee who works more than 20 hours a week or your payroll exceeds $150.00 you are then subject to the law covering Workman Compensation.

This agency will be glad to discuss this with you. Contact Paul I. Sheaffer or J. Wilbur Sollenberger.

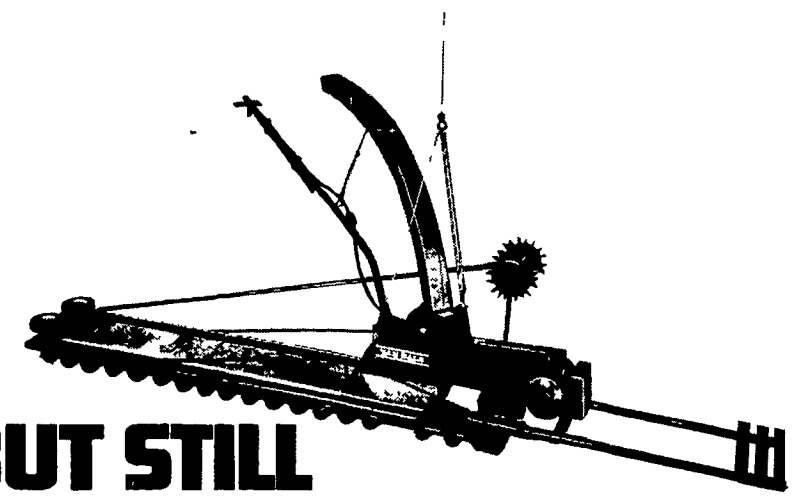
THERE'S A LITTLE PART OF VAN DALE IN EVERY UNLOADER...



BUT STILL ONLY ONE THAT'S GOT IT ALL TOGETHER.

In 1950, we introduced the most efficient silo unloader to the market. Simple, but efficient.

We've changed during the last 21 years. Added self-cleaning, wide throat impellers for tough to handle haylage. Dual, no-plug augers for smooth silage movement. Dependable, weather-sealed electrical systems to prevent failures. And numerous other performance-feature "firsts."

If you look around, you'll find a little part of VAN DALE in just about every unloader...

But only Van Dale sells it all together.

MODEL 1020 F 10-16 Ft. Diameter Silos—delivery to 15 tons/hr.

MODEL 1230 12-30 Ft. Diameter Silos—delivery to 25 tons/hr.

INDUSTRIAL Up to 40 Ft. Diameter Silos—delivery to 40 tons/hr.

Don't assume we know about your farm organization's meeting. To get your meeting on our Farm Calendar, it's safer to assume we don't know.

Remind us by calling 394-3047 or 626-2191 or by writing to Lancaster Farming, 22 E. Main St., Lititz, Pa. 17543. You'll be helping us to serve you better.

P.S. — If you're not sure you told us already, we don't mind hearing from you again.

Lancaster County Farmers Hear Committee Reports

Members of the Lancaster County Farmers Association service committee reported to the board that there has been nearly a 50 per cent increase in the use of the Safemark program in the County this year.

An additional dealer has been named to serve in the Safemark program The new dealer is J. Glenn Hess in the Central Manor area.

In related action, Noah Wenger, Stevens RD1, reported that statewide the rapid growth of the Safemark and the Business Analysis service programs require additional operating capital

Kreider reports that to raise this money, 15-year debentures yielding six per cent will be issued and can be purchased by members Interested members can receive additional information by contacting James Kreider, Quarryville, or Jay Greider, Elizabethtown

The insurance committee reported that all insurance matters should, until further notice, be directed to Farm Family Agency specialist Mark Campbell, 121 Swarthmore Drive, Lititz, 626-2663

In other action, the board voted to contribute financial support to the Dairy Princess pagent

The annual meeting date has been set for October 20 Further details will be issued later

Regulations and Rules Proposed for Plant Variety Protection Office

Regulations and rules of practice implementing the Plant Variety Protection Act and covering the operation of the Plant Variety Protection Office was proposed by the U.S. Department of Agriculture (USDA)

Officials of USDA's Agricultural Marketing Service explained that the Plant Variety Protection Act was enacted to encourage the development of novel varieties of plants which reproduce through seeds by providing exclusive rights of propagation to those who breed, develop, or discover these novel varieties.

The proposed regulations and rules of practice cover matters such as applying for a certificate of protection, marking and labeling protected seed, fees and charges, and appeals from decisions of the Plant Variety Protection Office.

The proposed regulations and rules of practice were published in the Federal Register April 18 Copies of the proposal may also be obtained from the Plant Variety Protection Office, Grain Division, Agricultural Marketing Service, U S Deparmtnet of Agriculture, 6525 Belcrest Road, Hyattsville, Mayland 20782.

You can still get weeds in corn with

AAtrex® plus oil

For fast kill of weeds that are up, apply AAtrex plus an emulsifiable crop oil.

AAtrex and the oil knocks down 1½" high weeds. And then AAtrex keeps weeds out for the rest of the season.

For more information see label or contact us. We'll be glad to give you all the details.

Leadership Training Conference

The Red Rose Association of the Future Farmers of American held its annual Leadership Training Conference at Penn Manor High School last week.

The Conference started with a welcome from Dr. E. J Berkebile, Superintendent of School, Penn Manor School District

Mike Martin, County secretary, gave the speech "The Polluting Man", with which he placed second in the Regional Speech contest last week

Winners of the FFA Quiz Contest were: Bob Buckwalter, Manor Chapter, first place, and Delmar Weaver, Grassland Chapter, second place.

Doyle Waybright, State FFA president, brought greetings from the State Association.

Adolph Bensinger, Solanco Chapter, delivered his speech which was third in the Regional contest, entitled "Leadership".

An FFA Creed Contest was held for the first time. Winners were: Jerry Erb, Manor Chapter, first place, and Nelson Martin, Pequea Valley Chapter, second place.

Chapter officer meetings were held During this session, officers were taught the responsibilites of being an officer

Honorary degrees were presented to Henry Givler, area vocational consultant, and Orval Bass, conservationist with the Lancaster County Soil and Water Conservation District.

Entertainment was provided by the New Holland Chapter at the banquet which concluded the days activities.

Henry Givler, left, area vocational consultant for Lancaster-Chester Counties, receives an Honorary Degree to the Red Rose Chapter, Future Farmers of America from Greg Landis, Red Rose Chapter president.

An FFA Creed contest was held during the Leadership Training Conference at Penn Manor High School. Presenting awards is John Miller, left, Red Rose sentinel from the Manheim FFA Chpater, to Jerry Erb, Manor FFA Chpater, first place winner, and Nelson Martin, Pequea Valley FFA Chapter, second. Looking on is the State president, Doyle Waybright, right.

Gerald Musser, left, Red Rose FFA treasurer, presents an award to Bob Buckwalter, Manor FFA Chapter, first place winner in the FFA Quiz contest. Standing at right is the second place winner, Delmar Weaver, Grassland FFA Chapter.

A group of Garden Spot High School students entertained during the banquet at the Leadership Training Conference at Penn Manor High School last week. Shown are: left to right, Mike Martin; Donna Hummer; Rosie Gehman, Grassland FFA Chapter Sweetheart; Bob Burkhart; Jim Zimmerman, and Larry Ressler.

Meat Judging Contest

Kunzler and Company, Lancaster, hosted a meat judging contest and workshop for FFA members last Saturday.

Results of contest were as follows·

Lloyd Hess, Manor Chapter, 306.9 points, first, John Weaver, Cloister Chapter 276.3 points, second; Melvin Weiler, Cloister Chapter, 246 9 points, third; Paul Horning, Cloister Chapter, 237 2 points, fourth, and Delmar Weaver, Grassland Chapter, 233.5 points, fifth

Serving as judge for the event was J. Heth.

Saved the Ship

Oliver Wendell Holmes wrote the stirring poem, "Old Ironsides," after he heard that the famous ship Constitution was to be destroyed by the U S government The poem caused so many protests against destroying the ship that it was saved

SMARTWEED?

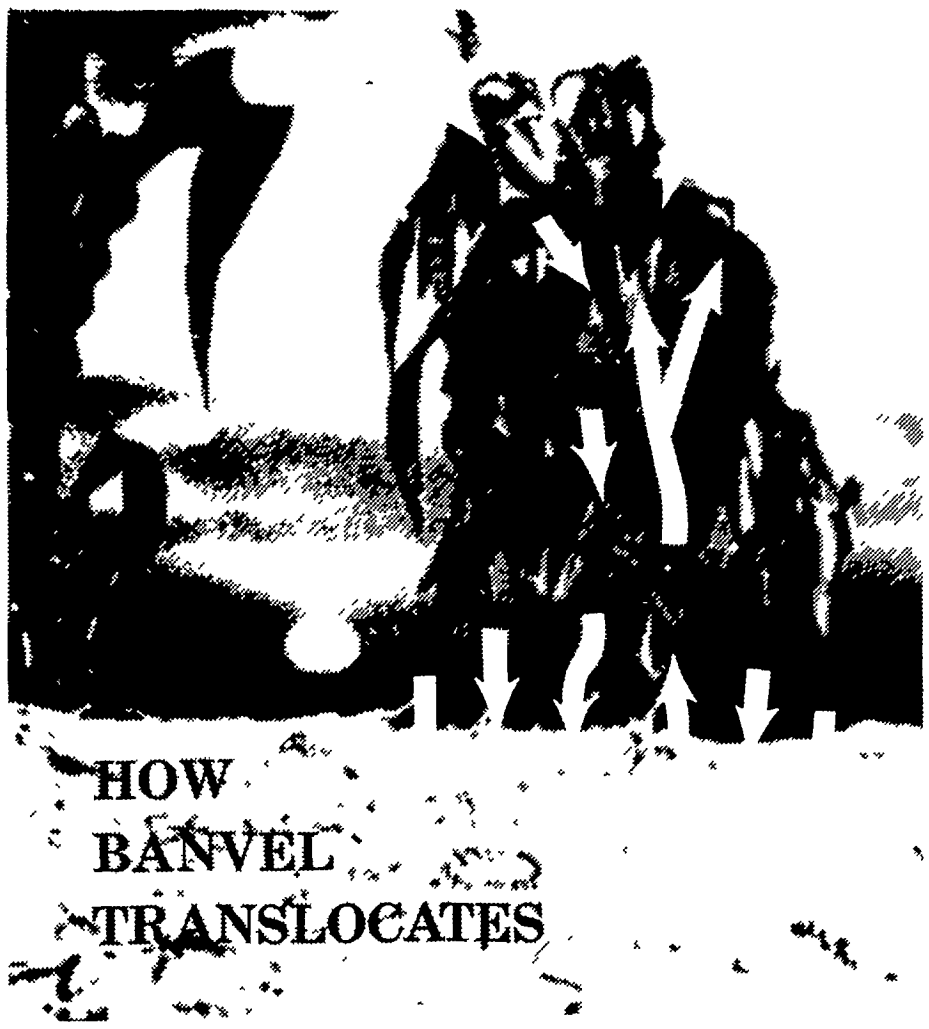
PIGWEED?

MORNING GLORY?

THISTLE?

BANVEL® Herbicide

POST-EMERGENCE APPLICATION IN FIELD CORN GETS TO THE ROOT OF YOUR TOUGH BROADLEAF WEED PROBLEM



Your corn crop is well along. But tough, deep-rooted weeds threaten to take over. The earlier you spray Banvel, the better, preferably before hot, humid weather.

Even though you spray over the tops of corn, normally no brittleness develops. If you see velvetleaf or pigweed, a lower rate of Banvel mixed with 2,4-D will give most effective control.

Banvel works! For one simple reason. Banvel translocates. Absorbed by leaves, stems, roots, Banvel moves with plant fluids from leaf tip to root tip. Destroys as it goes. So, no regrowth.

In permanent pasture, Banvel gives you easy control of more than 40 of the most common weeds, including wild garlic, weed brush and weed trees.

Cost of Banvel? Up to $1.90 per acre broadcast in corn. Ask your dealer or custom sprayer for full information.

Housekeeping Safety Check

Just this week, a Lancaster County homemaker was severly burned around her mid-section when the loose-fitting dacron blouse she was wearing caught fire as she leaned over the stove. Fortunately for her, her husband was at home at the time and was able to come to her aid

While lengthy hospitalization was not required for her burns, those sore blisters are going to be a reminder to her for some time to be more cautious and to take time to be safe

How are your work habits? Do you read about misfortunes, feel it was too bad but think it won't happen to you? So did this lady

The blanching-freezing-canning season is just around the corner and often leaves us harried wives and Mothers It is also the corn-planting season for the men, and soon it will be tobacco planting and hay making time, and that too leaves us too little time with too much to be done as we rustle together meals at odd hours

Here are some safety checks for you to consider about your work habits around your kitchen Answer these questions by answering with this letter scheme: I do— A—Always; S—Sometimes; N—Never; O—No Opportunity.

When I Cook

—Dry food thoroughly before deep-fat frying so water will not cause fat to spatter

—Use kitchen tongs to turn frying food or to remove food from hot water.

—Watch fat carefully, or set thermostat when frying to prevent over-heating.

—Keep knives sharp so strong pressure is unnecessary

—Use knife with sharp edge away from body

—Wash and dry knives separately, never leaving them in the dishpan or under water.

—Store knives carefully, preferably in slotted racks.

—Use proper opener for cans, jars and other containers-never a knife.

—Use a can opener that leaves a smooth edge.

—Work slowly when opening a vacuum can with a key to prevent snapping of the sharp metal band

—Dispose of sharp metal and broken dishes or glasses in well-wrapped package.

—Follow manufacturers' directions carefully when using pressure cooker, bakeware, electrical appliances, etc.

—Use a rubber scraper in the electric mixer bowl when the mixer is operating, never a metal or wooden spoon, fork or spatula.

—Use a stomper, not fingers, for pressing food into chopper

—Keep a vent tube of a pressure cooker open-if clogged, use a cleaning wire to open it.

—Stand to one side when lighting a gas oven-first opening the oven door for a few minutes, then lighting match before turning on the gas

——Have the oven thermostat checked if cakes do not bake in the time specified by the range manufacturer.

—Have kitchen arranged so large appliances and equipment do not protrude and cause bruises or falls.

—Keep work surfaces orderly during preparation of food.

—Close cupboard doors and drawers carefully, and keep them closed when not in use.

—Read directions before using pressure canner.

—See that gauge, safety valve and petcock of pressure canner are operating properly.

—Use standard glass containers especially made for home canning.

—Pack jars loosely in pressure canner or water bath canner.

—Always lift far side of cover of pressure cooker or canner to allow steam to escape safely.

—Use tongs when removing jars from canner. (Check tongs first to be sure they are in good condition.)

—Never can by oven method because of danger of explosion.

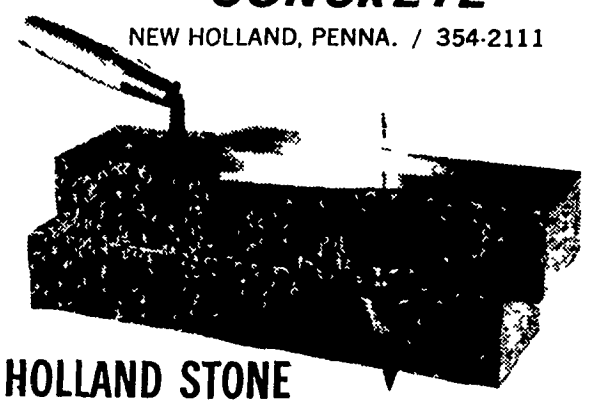
—Melt paraffin in a double boiler to prevent overheating.

—Wear canvas work gloves when rearranging the freezer or handling dry ice.

—Have adequate lighting over all work centers.

—Wear well-fitted tailored garments when cooking-never loose-fitting clothes with flowing sleeves or ties or projecting pockets and bows which might catch on equipment.

NEW HOLLAND CONCRETE
NEW HOLLAND, PENNA. / 354-2111



HOLLAND STONE
a luxury you can afford

Holland Stone was created especially for the innovative builder. It is unique in that it affords the builder an opportunity to design with the look of hand-cut stone at the lower cost of split face building units Actually a man made stone, Holland Stone is an exacting blend of stone aggregates that lend their natural colors for lasting beauty and permanence Ten distinctive colors, plus a wide variety of shapes and sizes, offer a wealth of design potential for residential, commercial, institutional construction. Almost any exterior or interior decorating motif can be achieved from classic to colonial to contemporary

Caution Urged Using Electric Hair Dryers

Wearing portable electric hood-type hair dryers while taking a bath or shower or doing the laundry or dishes could cause a big shock-literally-according to Extension home management specialists at Pennsylvania State University

There is great danger of electrical shock if a hair dryer should come in contact with water And it would be very easy for a dryer to be pulled accidentally into the shower or tub or other container of water.

Now that hair dryers are available in forms that are almost completely portable, such as clipped to the waist, or carried with a shoulder strap, they are being used under conditions which are probably the most hazardous ever

Keep bath and laundry rooms off limits to portable dryers at all times Even though the hose between the hood and unit may be electrically insulated, an electric current can still pass through if it gets wet. A dryer equipped with a three-prong grounding plug is not complete insurance against current leakage either, especially as the unit gets older or after it has been once disassembled for repair.

To be on the safe side, make yourself a rule· never wear your portable electric hair dryer if there is even a possibility that it may come in contact with water.

Home Economist Countian Named

Miss P Fay Binkley was appointed to the Pennsylvania State University Cooperative Extension Service as associate home economist assigned to Berks County, effective May 1.

Miss Binkley, who was employed as home service director for the UGI Corp in Lancaster from 1962 to 1972, received her B S degree in foods and nutrition from Albright College and a master's degree from Penn State, specializing in interior design.

The daughter of Mr and Mrs. Melvin Binkley, Denver, she is listed in Who's Who in American Colleges and Universities, Who's Who of American Women for 1972-73 and Two Thousand Women of Achievement for 1972-73

She is a member of both the American and Pennsylvania Home Economics Assns.; the Lancaster County Home Economics Assn. She is chairman of the Household Equipment Committee for Home Economics in Business, Philadelphia.

Fix-It Tip

It's time to check the condition of outdoor furniture while you are cleaning it The joints may be loose, legs wobble. It's a simple matter to tighten nuts and bolts as you go along

If screws or bolts are rusted or if the threads are stripped, replace them with new ones Use corrosion-resistant fasteners — plated steel for steel furniture, aluminum for wooden ones Tighten bolts on wooden furniture

Folding joints and pivoting parts should work smoothly If they don't, oil will take care of the problem

Bicycle Safety Urged

A plea to Pennsylvania's bicyclists and motorists for greater safety was made by State Traffic Safety director Julius A. Trombetta.

All cyclists are asked to follow the rules of bicycle safety. These are not only commonsense rules, but are law, part of the State's Vehicle Code. The rules are:

—Ride on the right side of the road, with traffic.

—Obey all traffic signs, such as "one way," "no left turn," etc. Stop at all stop signs and red lights.

—Signal all turns with the appropriate hand signal.

—Have a headlight in front and a red reflector in the rear for night riding.

—Never hitch a ride by holding on to another vehicle.

Motorists also are reminded to be aware of cyclists. When driving in residential areas watch for the young and often carless bicyclist who is apt to suddenly ride into traffic or swerve across one or more lanes of traffic. Be aware of adult and adolescent cyclists, too. Remember that bicycles have just as much right on the road as autos do.

Motorists are reminded not to risk causing a bicycle accident by either pulling out part way onto the road and not allowing the cyclist enough room to safely pass, or by passing a cyclist and then immediately making a right hand turn.

A new pamphlet "Safe Cycling" is available free to interested individuals and groups. The pamphlet can be obtained by writing: Bureau of Public Information, Pennsylvania Department of Transportation, Transportation and Safety Building, Harrisburg, 17120.

Modular Versus Mobile Homes

Today, the word "house" no longer adequately describes the many and varied types of housing in use in this country. New terms have been coined to accompany innovations in housing construction and type of dwelling.

June Wilke, Extension Home Economist, Chester County, explains that mobile homes have become an accepted and recognized form of housing. Newer still, yet different from mobile homes, are modular homes. Both are manufactured but different from one another in several respects.

Mobile homes usually remain on their own chassis. But modular homes are usually placed on permanent foundations. Because of this, says Miss Wilke, mobile homes are usually regarded as personal property while modular homes are, for legal purposes, considered real estate

Modular units can be used for high-rise apartments, garden apartments, town houses, vacation homes, or single family homes. And in commercial construction, modules are fitted together for school buildings, office buildings, dormitories and restaurants. Mobile homes lack this versatility.

Generally, modular homes look like homes constructed in the traditional way. They're built of conventional materials such as wood, steel and concrete.

We've questioned everyone from you to your uncle's second cousin.

"Tell us how you'd do it."

We've made the request uncountable times, in recent weeks. On your street or where you work

You've seen it on lapel buttons; on posters displayed in our bank's windows And you've read or heard it in our newspaper and radio advertising.

Our purpose has been to learn how you'd operate a bank. For, after all, you're the one who'll benefit from better, more personal bank services And you alone will decide which bank to favor with your business

When all the suggestions are in, we plan to think about them, talk about them and then do *something about them*

Why? Because we think that's how you'd do it

Farmers National Bank of Quarryville

Banking the way you'd do it.

SUBSCRIBE NOW

We know many of our readers regularly read a friend's or relative's copy of our publication

We don't mind. We appreciate all our readers.

But we wonder if everyone realizes how easy it is to receive our publication

On a yearly subscription in Lancaster County, the cost is less than four cents a week. Only $2.00 per year.

On a two-year subscription in Lancaster County, it's less than three cents a week. Only $3.00 for two years.

Because mailing rates are higher for out-of-county subscriptions, we have to charge more. But out-of-county readers can get the paper delivered every week for a yearly subscriptions which costs less than six cents a week and a two year subscription for less than five cents a week. Only $3.00 for one year and $5.00 for two years.

Think about it.

In these times of high and rising costs, we're sure you can't find a better bargain anywhere.

Call us at 394-3047 or 626-2191 Or write to Lancaster Farming, P. O. Box 266, Lititz, Pa. 17543.

Recipe Exchange

Home on the Range

This week we have a wide variety of recipes to use in our exchange, some sounding very old-fashioned and yummy, others more modern and tempting. Some seasonal recipes are beginning to come on the scene, such as rhubarb recipes.

We urge you to try your hand at making these additions to your meals Try it, you'll like it!

We also urge you to share your recipes with our readers. Send a recipe, or recipes, to: Recipes, Lancaster Farming, Box 266, Lititz, Pa. 17543. We'll send you a handy potholder for your efforts

xxx

Rhubarb Pies
(Makes 3 pies)

4½ cups rhubarb
3 cups brown sugar
3 eggs
3 heaping tablespoons flour
Crumbs
3 cups flour
1 cup brown sugar
1 cup lard
1 teaspoon soda
Pinch of cream of tartar

Put rhubarb into three pie shells Mix brown sugar, eggs and flour together Pour on top of rhubarb Mix crumb mixture together Put on top of rhubarb mixture

Bake at 400 degrees for 10 minutes, then 370 degrees til done (about 30 minutes)

"I am enclosing recipes using the electric blender and Knox gelatin You can prepare tempting dishes that be ready to serve almost immediately With this modern Blen 'n Gel method there's literally no cooking needed Just the time needed to boil a liquid Everthing else happens in your blender"

Vanilla Blen 'n Gel Dessert

2 envelopes Knox unflavored Gelatine
1½ cups cold milk, divided (for richer dessert, use ½ cup cold milk and 1 cup cream or evaporated milk)
1 cup milk, heated to full boil
2 eggs
½ cup sugar
⅛ teaspoon salt
2 teaspoons vanilla
1 cup ice cubes or crushed ice

1 Sprinkle gelatine over ½ cup cold milk in 5 cup container of electric blender, allow to stand until gelatine granules are moistened

2 Add boiling milk, cover and process at low speed until gelatine dissolves, about two minutes Stop blender

3 Add eggs, sugar, salt, vanilla and remaining one cup cold milk (or cream) Cover and turn control to high speed Remove cover and, with blender still running, add ice cubes one at a time Continue to process until ice is melted

4 Pour immediately into individual serving dishes, 5-cup mold or bowl

5 Chill until set Individual servings may be served after 20 to 30 minutes; bowl should be chilled about two hours. Makes six to eight servings.

Other variations of this recipe are:

Chocolate Blen 'n Gel

Reduce vanilla to 1 teaspoon. After dissolving the gelatine in step 2, add 1 package (1 cup) semi-sweet chocolate bits; cover and process until smooth.

Strawberry Blen 'n Gel

Omit vanilla. Reduce cold milk or cream by 1-3 cup. In step 3, add 1 package (10 ounces) frozen strawberries, partially thawed, and 2 teaspoons lemon juice with the eggs and sugar.

Mrs. John B Becker
R.D. 1
Ronks

xxx

Filled Doughnuts

1 pint milk, lukewarm
1 cup lard
2 tablespoons yeast
½ cup lukewarm water
½ teaspoon salt
2 eggs beaten
1 cup sugar
7 to 7½ cups flour

Dissolve yeast in warm water.

Mix and beat well, let rise, cut and let rise again Fry in deep lard and fill

Filling

2 beaten egg whites
4 tablespoons flour
2 tablespoons vanilla
4 tablespoons milk
2 cups 10X sugar
1½ cups Crisco

Add everything in bowl, then beat till smooth.

Susie S. Allgyer
R D 1
Bird-in-Hand

xxx

Walnut Glory Cake

¼ cup sifted all-purpose flour
2 teaspoons cinnamon
1 teaspoon salt
9 eggs, seperated
1½ cups sugar
2 teaspoons vanilla
2 cups finely chopped English walnuts

Sift flour with salt and cinnamon

Beat egg whites (1¼ cups) in large mixing bowl until soft mounds form, gradually add ¾ cup sugar Continue beating until very stiff, straight peaks form "Do not under-beat."

Combine egg yolks, ¾ cup sugar and vanilla in small mixing bowl. Beat until thick and lemon colored. Stir in dry ingredients. Fold batter gently but thoroughly into egg whites using a wire whip or spatula. Fold in walnuts.

Turn into ungreased 10-inch tube pan. Bake at 350 degrees for 55 to 60 minutes. Invert immediately. Cool completely before removing from pan. Frost with a vanilla glaze.

Mrs. David M. Nolt
R.D. 2
Ephrata

xxx

"Have you tried homemade soft pretzels? We think these are good, others might like to try them too."

Soft Pretzles

1 envelope yeast
Pinch of sugar
2 teaspoons salt
4 to 5 cups flour
Butter as needed
4 teaspoons soda
Coarse salt for sprinkling

Dissolve yeast in ¼ cup warm water. Then stir in an additional cup warm water. Add sugar and salt. Pour into bowl and beat in flour to make a stiff dough. Knead as for bread dough.

Place in bowl and spread with butter. Cover. Let rise 45 minutes or until double.

Shape pretzels into sticks or twists as you wish, about as thick as your finger. Bring one quart water to boiling, add soda. Drop three pretzels in at a time and boil one minute, until they float.

Remove and drain, place on buttered cookie sheet and bake at 475 degrees for about 12 minutes, or until golden brown. Sprinkle with salt before baking.

Mrs. E. M. Sensenig
R.D. 2
East Earl

xxx

Cocoanut Shoo Fly-Supreme

1 cup sifted enriched flour
¾ cup dark brown sugar, packed
1 tablespoon shortening, rounded
1 cup cocoanut
1 egg slightly beaten
1 cup dark table syrup
1 teaspoon baking soda
1 cup hot water
Pastry for one 9-inch pie crust

Mix first four ingredients together to form crumbs. Reserve ½ cup of this mixture for topping.

In another bowl mix the egg, syrup and ¾ cup of the hot water. Add to dry mixture. Dissolve soda in remaining ¼ cup hot water and add to above mixture. Pour in unbaked pie shell, sprinkle with the remaining crumbs, and put in oven immediately.

Bake at 375 degrees for 35 minutes.

"Very good."

Mrs. William Graybill
R.D. 1
New Providence

xxx

Frosted Sandwich Loaf

(Sets the pace for summer garden party or patio picnic)

Egg Salad Filling:
4 hard-cooked eggs, chopped
3 tablespoons mayonnaise
2 teaspoons prepared mustard
1 teaspoon grated onion
½ teaspoon salt

Ham Filling:
1 cup ground cooked ham
1-3 cup mayonnaise
1 teaspoon prepared horseradish

Chicken Filling:
15-ounce can boned chicken, chopped
¼ cup finely chopped celery
¼ cup mayonnaise
2 tablespoons pickle relish
1 unsliced sandwich loaf

Combine ingredients for each filling. Trim crusts from loaf. Slice bread lengthwise in four equal layers. Butter slices. Spread first slice, butter side up, with egg-salad filling, second slice, ham filling, third slice with chicken filling. End with fourth slice. Wrap loaf in foil; chill.

Beat three 3-ounce packages softened cream cheese with five tablespoons top milk till fluffy; frost loaf.

Trim—"Daisy" garnish: Egg slice petals and a gree-pepper stem. Circle with pineapple rings, stems on cherries. Makes 10 slices.

Mrs. Robert Rohrer
R.D. 1
Nottingham

xxx

Lemon Sponge Pie
(2 Pies)

2 cups granulated sugar
1 cup margarine
4 eggs
3 cups milk
6 tablespoons flour
3 lemons
(Use juice of 3 and grated rind of 2)

Cream butter, sugar, and egg yolks; add lemon juice and rind. Warm milk, then sprinkle the flour as you are mixing ingredients. Last of all add beaten egg whites from the 4 eggs. Bake at 375 degrees for 45 minutes.

Mrs. Donald Burkhart
R.D. 1
Strasburg

xxx

White Bread

¼ cup sugar
2 tablespoons shortening
4 teaspoons salt
4 cups milk, scalded
1 package yeast
¼ cup lukewarm water
12 to 14 cups flour

Combine sugar, salt, milk and

shortening. Stir thoroughly and cool to lukewarm.

Dissolve yeast in ¼ cup lukewarm water and add to liquid and stir thoroughly. Sift 2 cups flour into liquid and stir thoroughly. Continue to add sifted flour and stir or knead sufficient flour until the dough mixture does not stick to hands or board.

Place in greased bowl and cover. Let rise until double in size, turn dough out on floured surface and knead down thoroughly. Then put in 4 pans, cover and let rise again.

Bake at 400 degrees for 5 minutes, then turn to 350 degrees for 30 to 35 minutes.

Mrs. Luke Peters
R.D. 2
Manheim

Knee Patches or Swiss Crumpets

3 eggs
1 cup cream
4 cups flour
½ teaspoon salt

Beat eggs and cream. Sift flour and salt together. Stir into mixture to make a soft dough.

Take a piece of dough, the piece being marble size. Roll as thin as possible, slice into peach size. Fry in deep fat, 375 degrees, until only delicate brown. Drain and dust with powdered sugar.

Makes 24 to 30 patches. Most popular treat at weddings.

Ladies, Have You Heard?

By Doris Thomas,
Extension Home Economist

Doris Thomas

How's this for a bit of wisdom that has been milked for all it's worth: milk is good for you! Yet it's especially important to remember that truism now, when the weather's getting hot; during the summer, people often crave cold water or sodas and forget that a glass of cold milk helps you take the heat in your stride

Milk production, says the U.S. Department of Agriculture, will be at or near its peak during May, indicating ample supplies for consumers. Appropriately enough, June is Dairy Month.. ..so it's a good time all around to make sure you're using milk to best advantage

If you want to cut food costs and still provide the milk your family needs, you can try changing your pattern of buying and using milk. Here are a few sugfgestions:

Buy fresh fluid milk at a food or dairy retail store. Milk often costs more when delivered to the home.

Buy fresh milk in multiquart containers, if you can use this much without waste. Usually, milk in half-gallon containers costs less per quart than single quarts.

Remember also, especially when the weather is warm, to refrigerate milk as soon as possible after purchase or delivery. Letting milk stand in the sunlight causes loss of riboflavin and may affect flavor. Don't mix new milk with old except for immediate use and remember, for best flavor, use fresh milk within three to five days after purchase.

Variety of Fabrics and Findings for Home Sewing Requires Careful Selection

Home sewing is a creative form of self-expression as well as an economic practicality for many women The frequently-used home sewing machine represents substantial savings, even when working with expensive fabrics

Not only are sewing machines more versatile and easier to use, but fabrics, patterns, trimmings and notions are available in a great variety These developments in fabrics allows you to sew garments from lingerie to rainwear The range of fabrics includes stretch materials, knits, bondeds, fake furs, suede, vinyl and polyurethane. Manufacturer's are keeping pace with the home sewer's desires for style, color and individuality.

A big bonus in home sewing is the washability of fabrics and findings When you're faced with almost unlimited choice, you need to exercise caution and care and be well informed before making selections. This means choosing trims, pocketing, interfacing and lining fabrics, ribbons, binding tape, thread, zippers and other notions with an eye to how each will work with the basic fabric Why sew a durable press garment if you'll have to iron the trim. What will you do when a zipper shrinks more than the fabric and results in puckering and pulling after you launder the garment for the first time?

Take time to shop for trims; take fabric swatches to the store for accurate matching

FARM CREDIT SERVICE

We're your kind of people.

NEED MONEY AS BIG AS YOUR PLANS?
CALL FARM CREDIT.

We think farmers should have growth and **profit plans.** Sound plans. And we're ready to help. Not only with money, but with financial counsel, like income projections. Long-term loans may be arranged through the Federal Land Bank Association, and short-term loans through Production Credit Association. We'll provide money when you need it, and let you pay it back on a realistic schedule. You see, our only business is helping farmers, and that makes all the difference.

Farm Women Societies

Society 1

Farm Women Society 1 held a Mother-Daughter banquet recently at the Brunnerville Fire Hall. A turkey dinner was served to 60 members and guests

Invocation was given by Mrs Paul Kurtz. Devotions were led by Mrs Willis Bucher.

Mrs. Graybill Hollinger, president, conducted a short business meeting Members voted to give $25 to Lancaster Association of Retarded Children (LARC), the County Farm Women's project

The following members sewed at the Lancaster General Hospital recently Mrs Martin Moore, Mrs Graybill Hollinger, Mrs John Newcomer and Mrs J. Clayton Sangrey

Members voted to purchase new Farm Women and American Flags for the Society

Miss Ann Nolt, 209 E Second Ave , Lititz, a senior home economics student at Warwick High School, and Dale Martin, Lititz RD4, a senior agriculture student at Warwick High School, were honored and given awards

The following members will go to Embreeville on July 14 to present entertainment and refreshments Mrs Joseph Russel, Mrs Scott Garman, Mrs Noah Kreider, Mrs George Zahn, Mrs Ira Shearer Mrs Elmer Hershey, Mrs Graybill Hollinger and Mrs Roy Brubaker

The Society is planning a bus trip to Sterling Forrest Gardens, New York, on June 14

Table arrangements were given to the following newest grandmother, Mrs Amos Shenk, person who came the farathest, Mrs. Effie Fyock, person who had the most daughters and granddaughters, Mrs. Noah Kreider; tallest daughtyer between eight and 12 years of age, Terry Newcomer; mother whose daughter lives the farthest away, Mrs Martin Hess; person who was president most often, Mrs Neil Clark, and person with most buttons on her dress, Sharon Hoover

The guest speaker was Mrs George Russo Jr. of Lancaster. Her subject was "It's Easy to be Creative "

The next meeting will be a family picnic and covered dish meal at Middle Creek Church pavilion at 6·30 p m Saturday, June 24 The social committee will be in charge of games.

Society 3

Farm Women Society 3 entertained County Officers and Society 17 members from Drumore recently at a luncheon held at Salem Lutheran Church, Ephrata Mrs Luther Moore led the devotions

During the business meeting, conducted by Mrs Clarence Stauffer, $50 was given to LARC, the County project Members will assist the Auxiliary of the Ephrata Community Hospital in June

Mrs Jay Miller reported 33 dozen cancer pads were made at a recent sewing party

The Rev Elwood Mebel, pastor of Salem UCC, Leola, gave an illustrated lecture on the 'Easter Message '

The next meeting will be a ceramic demonstration by Mrs Harvey Gehman and Mrs. William Eberly at the Salem Lutheran Church. Mrs. Luther Moore will be the hostess.

Society 4

Farm Women Society 4 used the program theme "Ice-cream, Ice-cream" recently for a meeting held at the Zion United Lutheran Church, Landisville. Mrs. Paul Kauffman and Mrs. Wilbur Kauffman, hostesses, served homemade freezer-churned ice cream and presented members with a copy of each hostesses favorite recipe for ice cream

Mrs Carl Siegrist, in recognition of Arbor Day, based the devotional presentation on trees, according to scripture and legend The legend of the Gum Tree was read

Miss Cindy Boshnaugle, a fifth grade student at Mountville Elementary School, presented a ventriloquist skit with "Danny her dummy. She is a daughter of Mr and Mrs. Donald Boshnaugle, Columbia RD1.

A gift of $50 was authorized for the County Project of the Society of Farm Women of Lancaster County for 1972. The money will be forwarded to the treasurer of the County Society to be held in escrow with gifts from others of the 31 local Societies to be presented in the name of the County Farm Women in October. The Lancaster Association for Retarded Children (LARC) will be the recipient in 1972.

During the business portion of the meeting, Mrs. Robert Garber, president, announced that the 55th annual convention of the Society of Farm Women of Lancaster County will be held November 4 at the Lancaster School of the Bible. She also asked for help in preparing sandwiches for the USO birthday party which County Farm Women chaperoned and provided refreshments for.

Mrs. Edwin Yeaglin, special activities chairman, reported on a recent meeting as guests of Society 21 held in Memorial United Methodist Church, Quarryville. A fashion show was featured.

Mrs. Yeaglin also outlined tentative plans for a group "car-o-van" to Allenberry Playhouse on August 6 to see "Fiddler on the Roof". A reservation count will be made at the May meeting so that group rate tickets may be purchased.

Mrs. Garber invited members who live on farms to serve as hostesses for housing overnight a group of German farm women who are planning a tour of Pennsylvania farms in October. They are expected to be in our area for two nights, with daytime excursions planned apart from the overnight hostessing. Interested persons may contact Mrs. John N. Hess, Mountville, former County president, for information.

The next meeting of Society 4 will be held May 20 at the Hempfield United Church of Christ, instead of May 27 as previously planned. Members of Society 18 will be guests at a luncheon at 12:30 p.m.

Farm Women Societies

(Continued From Page 26)

Mrs. Edward Schopf, Mountville, as guest speaker at a Mother-Daughter banquet at Meadow Hills Dining House last week.

Mrs. Schopf, accompanied by her daughter Kim, showed slides and told of their adventures on an educational tour of Central America with special interest centered on Guatemala, where they lived during most of their stay, while her husband researched during his sabbatical leave from the Rohrerstown Elementary School.

Mrs. John Newswanger, program chairman, was in charge of the program and games. Prizes were presented to Mrs. Harold Greider, Mrs. Paul Keagy, Mrs. Jay Charles, Miss Kim Schopf, Mrs. Charles Kauffman, Mrs. Ben Shenk, Mrs. Paul Keperling, Mrs. David Funk and Mrs. Amos Dillman, Leola, for such reasons as washing kitchen floors on Tuesday, having the most change in her purse, making a homemade cake, having the newest shoes, eating bread at three meals on the day of the banquet, attending church more than three times in a week, being finished with spring housecleaning, mowing yard that day, and for the nearest birthday

Mrs. Newswanger presented a report of the past 20 years as members of Society of Farm Women 23. The group was organized in January, 1952. Mrs Harold Hoak compiled the information.

The third free tetanus clinic will be held May 23 at the Nissley Farm Service Store, Charlestown Road, Washington Boro RD1, at 7 p.m. Mrs. Andrew Nissley, registered nurse and member, will be in charge. Dr. David Weinberg, Columbia, will be the physician attending.

The next meeting will be a covered dish supper and family picnic to be held June 10 at 6 p.m. at the home of Mr. and Mrs. J. Clayton Charles, Lancaster RD2.

Society 27

Farm Women Society 27 enjoyed "Special Friends" night at the home of Mrs. James Garber, Mount Joy RD2, recently. Each member introduced her "special friend" as roll was called Mrs. Harry McCleneghan led in devotions Cohostesses were Mrs James Brubaker, Mrs Arthur Wenger and Mrs Russel Swarr

Special speaker for the evening was Miss Joann Hess from Mount Joy, who demonstrated the art of eating and identifying objects while having the handicap of blindness. She told of the frustrations and amusing incidents one encounters as a blind person. She also stressed that blind persons should not all be placed in one category. They are as individualistic as any sighted person.

Her musical talent was evident as she sang folk-type and inspirational songs accompanied by her bass ukulele.

President Mrs. Roy Sauder presided over the business portion of the meeting during which it was decided to donate $25 to LARC.

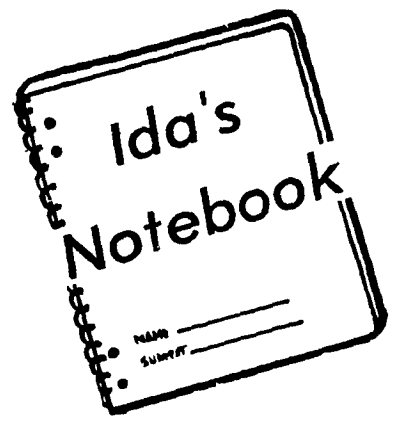
Resignation of one member was accepted.

Mrs Robert Kauffman was chosen to represent Society 27 in the Farm Woman of the Year contest.

Members and guests will be traveling by bus to Longwood Gardens and Winterthur Museum on May 16.

Recipe Correction

There was an error last week in the amount of shortening called for in Mrs. Sauder's Pennsylvania Dutch Shoo-Fly Pie recipe. The amount should have read ½ cup shortening, not 2 ½ cups



Ida Risser

It has been the custom at our house to bring me flowers on May Day There is a special method of delivery. First, a loud knock on the front door followed by running feet as the child hides before the door is opened

I've been lucky enough to have small children carry out this tradition for each of the last 20 years. This year I found a big bouquet of Virginia bluebells and a small one of violets and spring beauty. Of course, the children always get a kiss and a hug for their thoughtfulness.

Another sign of Spring is the return of many very noisy Bluejays to our meadow. Their feathers are beautiful but I find their loud, harsh calls unpleasant The thrushes are here also and are busy building their nests in blackberry brambles. When young birds are in the nest, the thrush is quite brave and swoop very close to persons who disturb her.

xxx

One of the advantages of a Community 4-H Cllub is the diversification within the Club. There is such a variety of projects available that most any child can find one to his liking.

My own children have tried their hand at raising pigs, growing sweetcorn, raising flowers, collecting and identifying rocks, building a bookcase and caring for bees. It is only by doing a number of things that they have a basis for deciding in which direction their interest lies.

The appeal of some particular project may hold their interest for life.

xxx

My love of reading books far surpasses the time I can find to do it. This doesn't keep me from buying books and hoping to read them some day between luncheons, committee meetings and phone calls

Last month I bought several books from a collection of a retired minister They covered subjects such as cultivating wildflowers, poetry and even the Apocrypha The few extra books I picked up at the book sale in the Lancaster Library only added to my unread collection.

"The Harvestore System solved our number one problem—labor. Last year we baled 10,000 bales, this year only 800 . . .

Just two of us can put up haylage According to Pennsylvania Farmer's Association figures, purchased feed used to cost up $1 00 per cwt of milk. We have cut it down to 9¢ per cwt. Our cows came up .3% butterfat on high moisture corn In '69, without Harvestores, our return on investment was 8.38%. In '70, with Harvestores, it was 13.42%."

Phase Converters Helpful on Farms

How to operate three-phase motors from single-phase power using phase converters is the subject of a new U. S. Department of Agriculture bulletin.

Phase converters are helpful on farms when three-phase power is unavailable or too costly to install, and for other reasons.

The publication, issued by USDA's Agricultural Research Service (ARS), tells how the converter alters single-phase power into three-phase power and how to select, install and protect both the phase converter and the three-phase motors The bulletin does caution, however, that phase-converters, like any piece of electrical equipment, should be installed and serviced by an experienced person

Three-phase motors are used instead of single-phase motors because they are more readily available and less expenisve than single-phase motors of the same horsepower They are also usually smaller, lighter and offer a greater choice in the type of motor-housing and horsepower rating

In addition, three-phase motors are simple in construction, need no starter windings or starting devices and can be reversed by altering connections to any two of the motor leads

The 21-page publication includes four pictures of various types of converters, six diagrams of wiring and five tables on motor-current values, current-carrying capacity of copper and aluminum conductors, and copper and aluminum wire size necessary for wiring converters.

Copies of Farmers Bulletin 2252, "Phase Converters for Operation of Three-Phase Motors from Single-Phase Power," are available for 15 cents each from the Superintendent of Documents, Government Printing Office, Washington, D. C 20402 Please include zipcodes.

Tips on Fresh Coconut

To check the quality of a coconut, Extension consumer specialists at Pennsylvania State University suggest you use the 'slosh' test to be sure there is milk inside See that no mold is present and that the eyes are not wet or pierced Hard as the coconut looks in its shaggy shell, the consumer specialists say it has three soft spots near one end To crack the coconut, pierce these soft spots with an ice pick and drain off the milk that is inside the shell Now tap the shell all over with a hammer until the hard shell cracks and falls off There is the delicious tender meat to use as you like

Clothing Styles For Various Ages

Just because you get older is no excuse to stop caring about clothes.

In fact, says Mrs. Ruth Ann Wilson, Extension clothing specialist at Pennsylvania State University, the first step toward fooling the calendar is to look alert and physically attractive. The quickest way to do this is to get up-to-date clothes. Observe the style clothing worn by others in your community, read advertisements, watch people in the news.

When you buy new clothes buy ones that are new in design. But, Mrs. Wilson reminds you that you may have to change the type of clothes you've been wearing. For example, an intelligent woman knows it's just as ridiculous to appear in an outfit designed for "Twiggy" as it is for a teenager to try to wear one designed for a mature woman of 40.

You can't be young forever, but you can be particular about your dress and your person. The Extension clothing specialist offers these additional suggestions:

—Continue to wear heels as long as you can but to choose them lower and sturdier.

—Wear nylon stretch stockings if you have varicose veins. These are available in neutral shades. Though they are opaque, they appear sheer.

—Select clothes that are easy to put on and take off. Look for garments that can be stepped into rather than ones that must be pulled over the head.

—Look for slightly flared skirts that sit well.

—Keep pretty, dressy stoles and soft pastel sweaters to ward off a chill.

Boiling Point

Helium boils at the lowest temperature of any substance in creation. At only about two degrees above absolute zero, this light, inert element turns from liquid into gas.

State 4-H Capitol Days

Lancaster County 4-H members, who will soon have an opportunity to help shape our state's laws, called upon area legislators to explain the functions of government during State 4-H Capitol Days in Harrisburg this week.

Those participating in the two days of citizenship activities from the county were: Linda Stolfzfus, Agnes Gibson, Debra Gregory, David Bitler, Carlton Mack and Nelson Martin.

These 4-H members joined with 4-H members from all Commonwealth counties to take part in programs designed to help them become more responsible adults.

The delegates met with Governor Milton J. Shapp, observed the State House of Representatives and Senate while in session, and toured the Capitol and William Penn Museum.

At the May 8 luncheon the group was welcomed by Henry Wilcox, director and field coordinator for the Pennsylvania Bureau of Rural Affairs and Marketing Service.

Following the luncheon, a unique educational program, "Democracy in Action," was conducted by 4-H members from Cumberland and Franklin counties.

The banquet program Monday evening featured two speakers who presented topics of current concern to youth. The Honorable William W. Lipsitt, Judge of Juvenile Court, 12th Judicial District, spoke on "The Juvenile Court and the Responsibility of the Community," and Leland G. Jinks, State 4-H Club leader at Pennsylvania State University, presented "Your 4-H Capital Days and Future Responsibilities."

Senators and Representatives were guests of the county delegations at a legislative breakfast May 9. At this function, members and lawmakers had an opportunity to discuss local issues and define the purposes of the educational youth program.

Speakers at the legislative breakfast were The Honorable Frank Sanders, Undersecretary of the Navy and Jennifer Riggs, 4-H member from Chester County. Mistress of ceremonies was Agness Gibson, Lancaster County 4-H member.

Frank E. Bortz, assistant State 4-H leader, coordinator for the event, pointed out that 4-H Capital Days is one of the highlights of the 4-H citizenship program.

Brownstown FFA Members Win Contest

The Lancaster County FFA Floriculture Contest was held last week at the Mount Joy Vo-Tech School. Fifteen contestants from Dauphin County, Brownstown Vo-Tech School and Mount Joy Vo-Tech School competed in flower arranging and corsage design.

The contest was sponsored by the Red Rose FFA Chapter. There were idividual plaques and a team trophy presented at the conclusion of the contest. The participants, all girls, are members of the County Chapter and also of their local Chapters.

Winners in the contest were: Ann Denlinger, first; Pam Wood, second, and Deb Sager, third These girls are all students at the Brownstown Vo-Tech School. The Brownstown team received the team trophy, which they will hold until next years contest

The team from Mount Joy Vo-Tech School was made up of Linda Gamber, Tina Eisenhauer, Kathy Hershey, Cynthia Moore and Debbie Marley

Judges for the contest were Dr. Richard Stinson, Penn State University, and Miss Judy Levine, student teacher from Penn State

Oldest Living Things

The bristlecone pines in California's White Mountains are the oldest living things on earth. Of the 17 specimens established by ring count to be over 4,000 years old, the extreme example began its growth about 2640 B.C

Pennsylvania Cattle On Feed Up 3 Per Cent

Pennsylvania cattle feeders had 81,000 cattle and calves on grain feed for slaughter market on April 1, up three per cent or 2,000 head from the number on feed April 1 last year.

Marketings of fed cattle during the January - March quarter of 30,000 were three per cent or 1,000 head less than marketings during the same period a year earlier.

Placements during the quarter were 20,000 — up 11 per cent or 2,000 head from a year ago. Expected total marketings of fed cattle during the April-June quarter at 41,000, if realized, would be eight per cent of 3,000 greater than marketings during the same period in 1971.

U.S. cattle and calves on feed April 1 for slaughter market totaled 12,792,000 head in the 23 major feeding States, up nine per cent from a year earlier.

Rabies Reports Increase

Residents of Greene County were cautioned that a dramatic upsurge of rabies cases has been verified in the past two months.

During Marach and April a total of seven animals reportedly contracted the disease - two skunks, two dogs, one cow, one calf and one fox.

Dr. E.V. Jeszenka, director of the Bureau of Animal Industry, urged that extreme care be exercised in approaching wild and stray animals. Attacks by any animals, he said, should be reported promptly to a physician.

He also urged all citizens to have their pets vaccinated against rabies and to keep these vaccinations up to date.

Parents are asked to discourage their children from playing with stray dogs and other potential carriers of rabies.

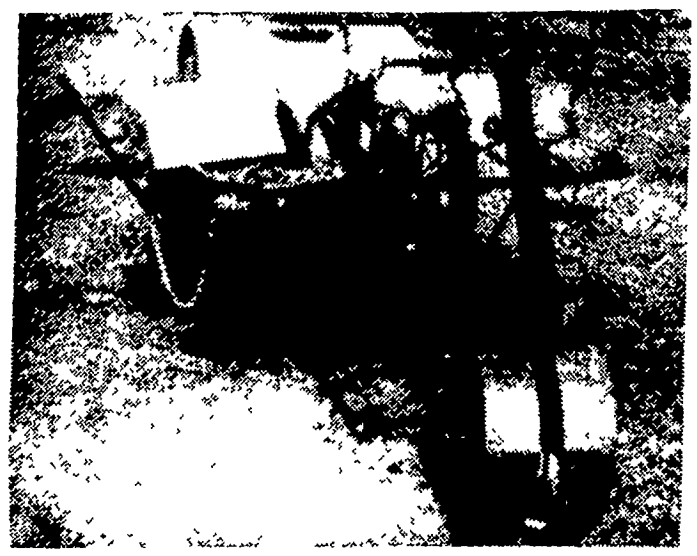
Rainy Weather Remains Problem

The weather was beginning to look favorable, fields were drying rapidly - then the rains came This pattern of frequent heavy rains has been repeated many times this spring and caused considerable delay in spring field work Lower, poorer drained soils never had a chance to dry out However, farmers were able to make some additional progress early in the week Farmers have done remarkably well in many regions despite the adverse conditions

Top soil moisture supplies jumped back on the wet side again, with three-fourths of the reporters indicating surplus moisture supplies with the remainder adequate

Main farm activites involved trying to squeeze in spring plowing, seedbed preparation and planting when conditions permitted However, many farmers were again limited to barn work as fields were still too set to support machinery

"The Genuine Mechanical Transplanter"



- New Amazing "Flo-Check" Water Valve (Patented) with Magic Air Control to assure uniform water supply to the plants regardless of water level in barrel.
- New Manual Shutoff with Automatic Roller Reset on Valve
- Positive Action, Self-Cleaning Neoprene Plant Grippers

June 15 Deadline to Certify Crop Acreages

Farmers enrolled in the 1972 wheat and-or feed grain program must certify crop acreages by June 15, 1972.

They must report all acreage of crops planted, and designate on the aerial photos the acreage that will be set-aside to meet program requirements. Farmers are reminded that the set-aside cropland must be of equal productivity to that used for growing crops.

A reporter will not visit the farm unless it is selected for spot-check after certification. To be sure of all acreages before certification, they should request low-cost measurement service. This will guarantee correct acreages, as well as the eligibility of the land.

Farmers are urged to visit the County ASCS office and certify as soon as all program crops are planted. Failure to certify by June 15, will mean loss of program payments.

TRY A CLASSIFIED—

The Solanco FFA Chapter elected the following officers to serve for 1972-73: front row, left to right, Mike Roland, chaplain; Randy Clark, treasurer; Wayne Kreider, president; Bill Krantz, first vice-president; Gary Akers, secretary-treasurer. Back row, left to right, Dave Bitler, second vice-president; Charles Coates, sentinel; Bill Hershey, third vice-president; Tom Perry, parlimentarian; Jeff Glackin, reporter, and Dave Gerhart, photographer.

Buckwalter Family Begins Three-year Missionary

Henry and Mildred Buckwalter, New Holland RD2, recently left the United States for a three-year missionary term in Belize, British Honduras, where they will serve as a business manager-guest house hostess couple.

Henry Buckwalter, the son of Mr. and Mrs. Ira J. Buckwalter, Intercourse, is a 1963 graduate of Lancaster Mennonite High School. He served in Mennonite Voluntary Service in British Honduras from November 1965 to January 1968. He was recently at Abram S. Horst, Inc., New Holland.

Mildred Buckwalter is the daughter of Mr. and Mrs. J Leroy Carper, 609 Penn Grant Rd., Lancaster. She is a 1962 graduate of Manheim Township High School and a graduate of the Lancaster District School of Practical Nursing. She served for one year in Mennonite Voluntary Service in Washington, D.C.

The Buckwalters have one son, Patrick Lynn

Ervin Peterson to Head USDA'S Marketing Service

Ervin L. Peterson has been named Administrator of the U. S. Department of Agriculture's Agricultural Marketing Service effective June 1.

Peterson was Assistant Secretary of Agriculture from 1954 to 1960. Currently he is Deputy Assistant Administrator for Technical Assistance in the U. S. State Department's Agency for International Development.

The Agricultural Marketing Service administers a variety of programs including, among others: establishment of grades and standards for agricultural products; grading of products; market news; marketing agreements and orders; purchase of foods for donation to schools, institutions, and needy families; promotion of plentiful foods; transportation and warehousing services.

INCREASE YIELDS $15.00 AN ACRE FOR 25¢

ORTHO ISOTOX® Seed Treater (F) is backed by the best kind of proof a corn seed-treater could have: over one hundred million successful corn acres. All kinds of climate. All types of soil. All sorts of men doing the planting. Yield increases run up to fifteen dollars an acre—from a product that costs about 25 cents to treat a 20,000 plant-population-acre.

These ladies are busy packaging fresh asparagus in polyethylene bags.

John F. Cope

(Continued From Page 1)

"There is absolutely no waste of asparagus in our processing method," said Cope "The entire asparagus is used in some manner" The thinner and less attractive spears have a market also, and, of course, the tips and cuts are popular frozen food commodities

Cope's also freezes asparagus "Once the asparagus has been washed, it is sized and graded, just as is our fresh asparagus Then, however, it is blanched in boiling water for three minutes It is then placed in cold water for a few moments, taken to a table where it is placed in boxes and weighed, sealed shut in the boxes, wrapped and placed in our freezer," Cope added. The freezer is set at zero degrees and the asparagus remains there until it is ready to be shipped.

"All the individual handling is what keeps the price of asparagus on the high side, noted Cope "However we do use some equipment to aid in the cutting and sizing which was designed by our plant superintendent, Clarence Stauffer This has helped us keep costs as low as possible"

So the next time you are about the complain about the high cost of asparagus remember what is involved in bringing it to your table. And also remember that it will be one of the freshest supermarket products you can buy

Among winners of the annual Farm and Home Foundation Scholarship Awards at the Farm and Home Center Tuesday night were: left to right, Gail Ann Kutz, Cynthia Darkes, Clyde Erb, Mary Ann Spotts and Randolph Hickernell.

Other recipients present to accept their scholarships at the annual Farm and Home Foundation Scholarship Awards presentation Tuesday night were: left to right, Gary Dean, Carol Harting, Douglas Brenner, Cynthia Binkley and Mary Lou Brodhecker.

"Life of the Party"

Lancaster County 4-H members will present the play "Life of the Party", written by Marijane and Joseph Hayes, at 8 p m Friday and Saturday, May 26 and 27, at Conestoga Valley High School

Play director is Miss Judy Kirchoff, teacher of political science and economics at Hempfield High School

Cast members include the following 4-H'ers· Cindy Balmer, Lititz RD4, Nancy Yunginger, Marietta RD1, Sue Buckwalter, Lititz RD3, Gary Dean, Strasburg RD1, Rick Hess, Strasburg RD1, Nancy Zimmerman, Ephrata RD1, Cindy Reed, 150 Elmwood Road, Lancaster, Donna Rohrer, 2439 Old Philadelphia Pike, Lancaster

Robin Fellenbaum, 1580 Fruitville Pike, Lancaster; Darryl Bollinger, Manheim RD1; Suzanne Irwin, 1022 Church Street, Lancaster; Sandra Arnold, 1038 Church Street, Lancaster, Mike Peifer, Manheim RD1, Mark Moyer, Manheim RD1; Doris Hershey, 304 Newport Road, Lititz; Ray Brubaker, 206 Rohrerstown Road, Lancaster, and Phil Bixler, Marietta RD1.

Price of tickets is $1.25 for adults and 75 cents for students. Tickets will be available at the door the nights of the play.

Farm and Home

(Continued From Page 1)

President Ave., Lancaster,, Manheim Township High School, who will attend Drexel University.

Mary Ann Spotts, daughter of Mr. and Mrs. Paul Spotts, Mill Street, Bowmansville, Garden Spot High School, who will attend Mansfield State College.

The scholarships were awarded from the earnings from the irrevocable trust fund established by the late Elmer L. Esbenshade, one of the founders of the Farm and Home Center, and from a special educational program sponsored by the Farm and Home Foundation.

The scholarships are awarded on the basis of financial need, scholastic achievement and leadership ability. Applicants must meet scholastic and entrance requirements for an accredited program in either agriculture or home economics at a college or university.

Seedlings Planted

Wildlife in the state will benefit from over 5 6 million seedlings planted throughout Pennsylvania this Spring The Seedlings were produced at the Pennsylvania Game Commission's nursery at Howard in Centre County

Sportsmen's groups, conservation clubs, soil and water conservation districts, landowners cooperating in programs of the Game Commission designed to keep private holdings open to public hunting, coal stripping operators and others received seedlings which will provide future food and cover for wildlife.

More than half of the seedlings were planted by Game Commission personnel on State Game Lands, tracts purchased with funds derived from the sale of hunting licenses and maintained as public hunting areas, and on farm-game projects, private land which is kept open to public hunting

Species distributed included scotch pine, red pine, white pine, Austrian pine, Norway spruce, white spruce, mugho pine, hemlock, willow, bittersweet, multiflora rose, autumn olive, black locust, silky dogwood, Tartarian honeysuckle, chestnut, Asiatic crabapple, coral berry, sawtooth oak, bristly locust and button bush

The seedlings are provided free of charge by the Game Commission, and planting and maintenance for the benefit of wildlife are usually provided by interested sportsmen and landowners.

Announcing: a dry "pop-up"! Can cut planting time in half!

Ortho Unipel STARTER SPECIAL.

A starter? As a "pop-up"? It has to be special.

It is. STARTER SPECIAL is a completely unique product. Here's why:

— Physical Uniformity. STARTER SPECIAL pellets are made to the same shape and density for maximum consistency and control in application.

— Chemical Uniformity. Each and every STARTER SPECIAL pellet has all three primary nutrients — nitrogen, phosphorus, potassium — chemically homogenized in precisely the most desirable ratio. 13-34-10. The nutrients can't separate or segregate during handling as with troublesome, hard-to-regulate "dry blends."

— Double Duty Nutrients. STARTER SPECIAL has both quick-acting and long-lasting nitrogen and phosphorus for thorough plant feeding There is no urea or diammonium phosphate that might endanger the seed through liberation of free ammonia.

Of course, these features also make it highly effective as a banded starter. But, with only slight adaptation of most planters, it can be applied directly with the seed in exacting measurement for safety and maximum response.

With this kind of control, you apply much less material — only 1/3 the amount needed for banding And the reduced material handling could cut your planting time in half!

So, save time, trouble, and money at planting time. See us soon about applying STARTER SPECIAL this spring as a dry "pop-up".

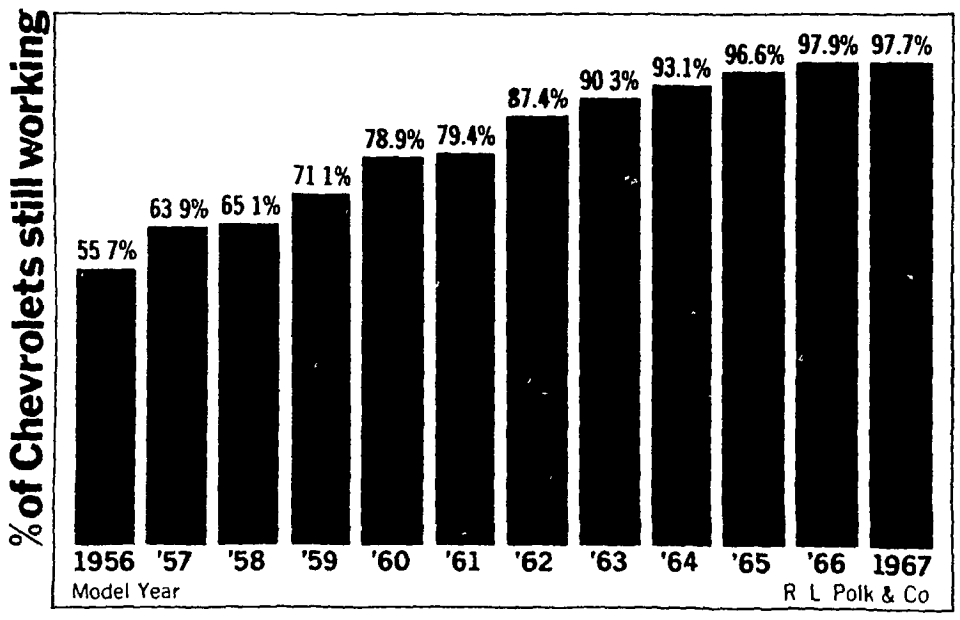
There are two ways to prove how tough a Chevy pickup is

Long life is one proof of toughness...

And as you can see by the chart, people drive Chevy trucks a long time. We think it's because they're designed better. And built better.



Proof of how long Chevy trucks last. Going back as far as 1956, for example, over 55% of the Chevrolet trucks of that model year are still working. No competitive make has as many as half of its '56 models still on the job. And nobody else matches Chevy's consistently high percentages in the years since.

Built to last! Priced to go! Right now!

Public Apology,

I wish to thank all the buyers we had on April 3, 1972, for the good support they gave us. I am very sorry we could not sell everything in a one day period. I also wish to apologize to the people who would have liked tractors but could not wait. I promise to faithfully follow the time schedule on this sale bill. At 3:00 P.M. we will sell tractors regardless of our position in the field. We will have the same good quality machinery, combines, and tractors for you to choose from. We are open for daily business and do promise to give you a good deal. Thank you all again very much and I am looking for your support on this coming sale. If you have any comments or suggestions please let me know. I want to have this sale for our customers, you come first.

Lloyd J. Wenger
Sales Manager

REMEMBER
QUALITY FARM MACHINERY COMES FROM MYERSTOWN!

Since Wengers' are full of bologna, we decided to hand out the original Lebanon Bologna all day long at regular intervals.

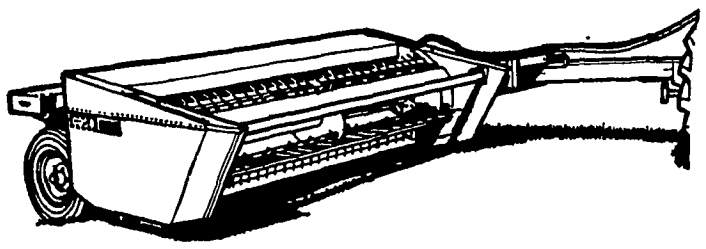
New Case 7-foot windrow-conditioner

treats hay like the big ones ...and then some!



The CASE 475 offers more. Like putting less hay in the windrow than a 9-foot — for faster drying-curing, especially the first cutting. It takes less horsepower, too — a 2 or 3 plow tractor does the job. And you have less overall width — just 9½ feet — for passing through narrow gates and lanes.

RAISING BABY CHICKS AND STARTED PULLETS ON YOUR FARM WHERE LEUCOCIS IS A PROBLEM?

WE RECOMMEND YOU ORDER

MUSSER'S M-327 CHICKS

STARTED AND MATURED PULLETS AND YEARLING HENS AND BREEDING COCKEREL.

WHY? Because our breeding program on our farm has been very effective in breeding resistance to Leucosis and Marek's disease

We can offer you M 327 chicks vaccinated or not vaccinated for Marek's disease and you can expect excellent results.

By having built this resistance to Marek's and Leucosis during the earlier years, we have been able to improve our egg size, our egg production and what it takes to produce a chick that will develop into a pullet capable of showing a profit even in a year which we are experiencing at present.

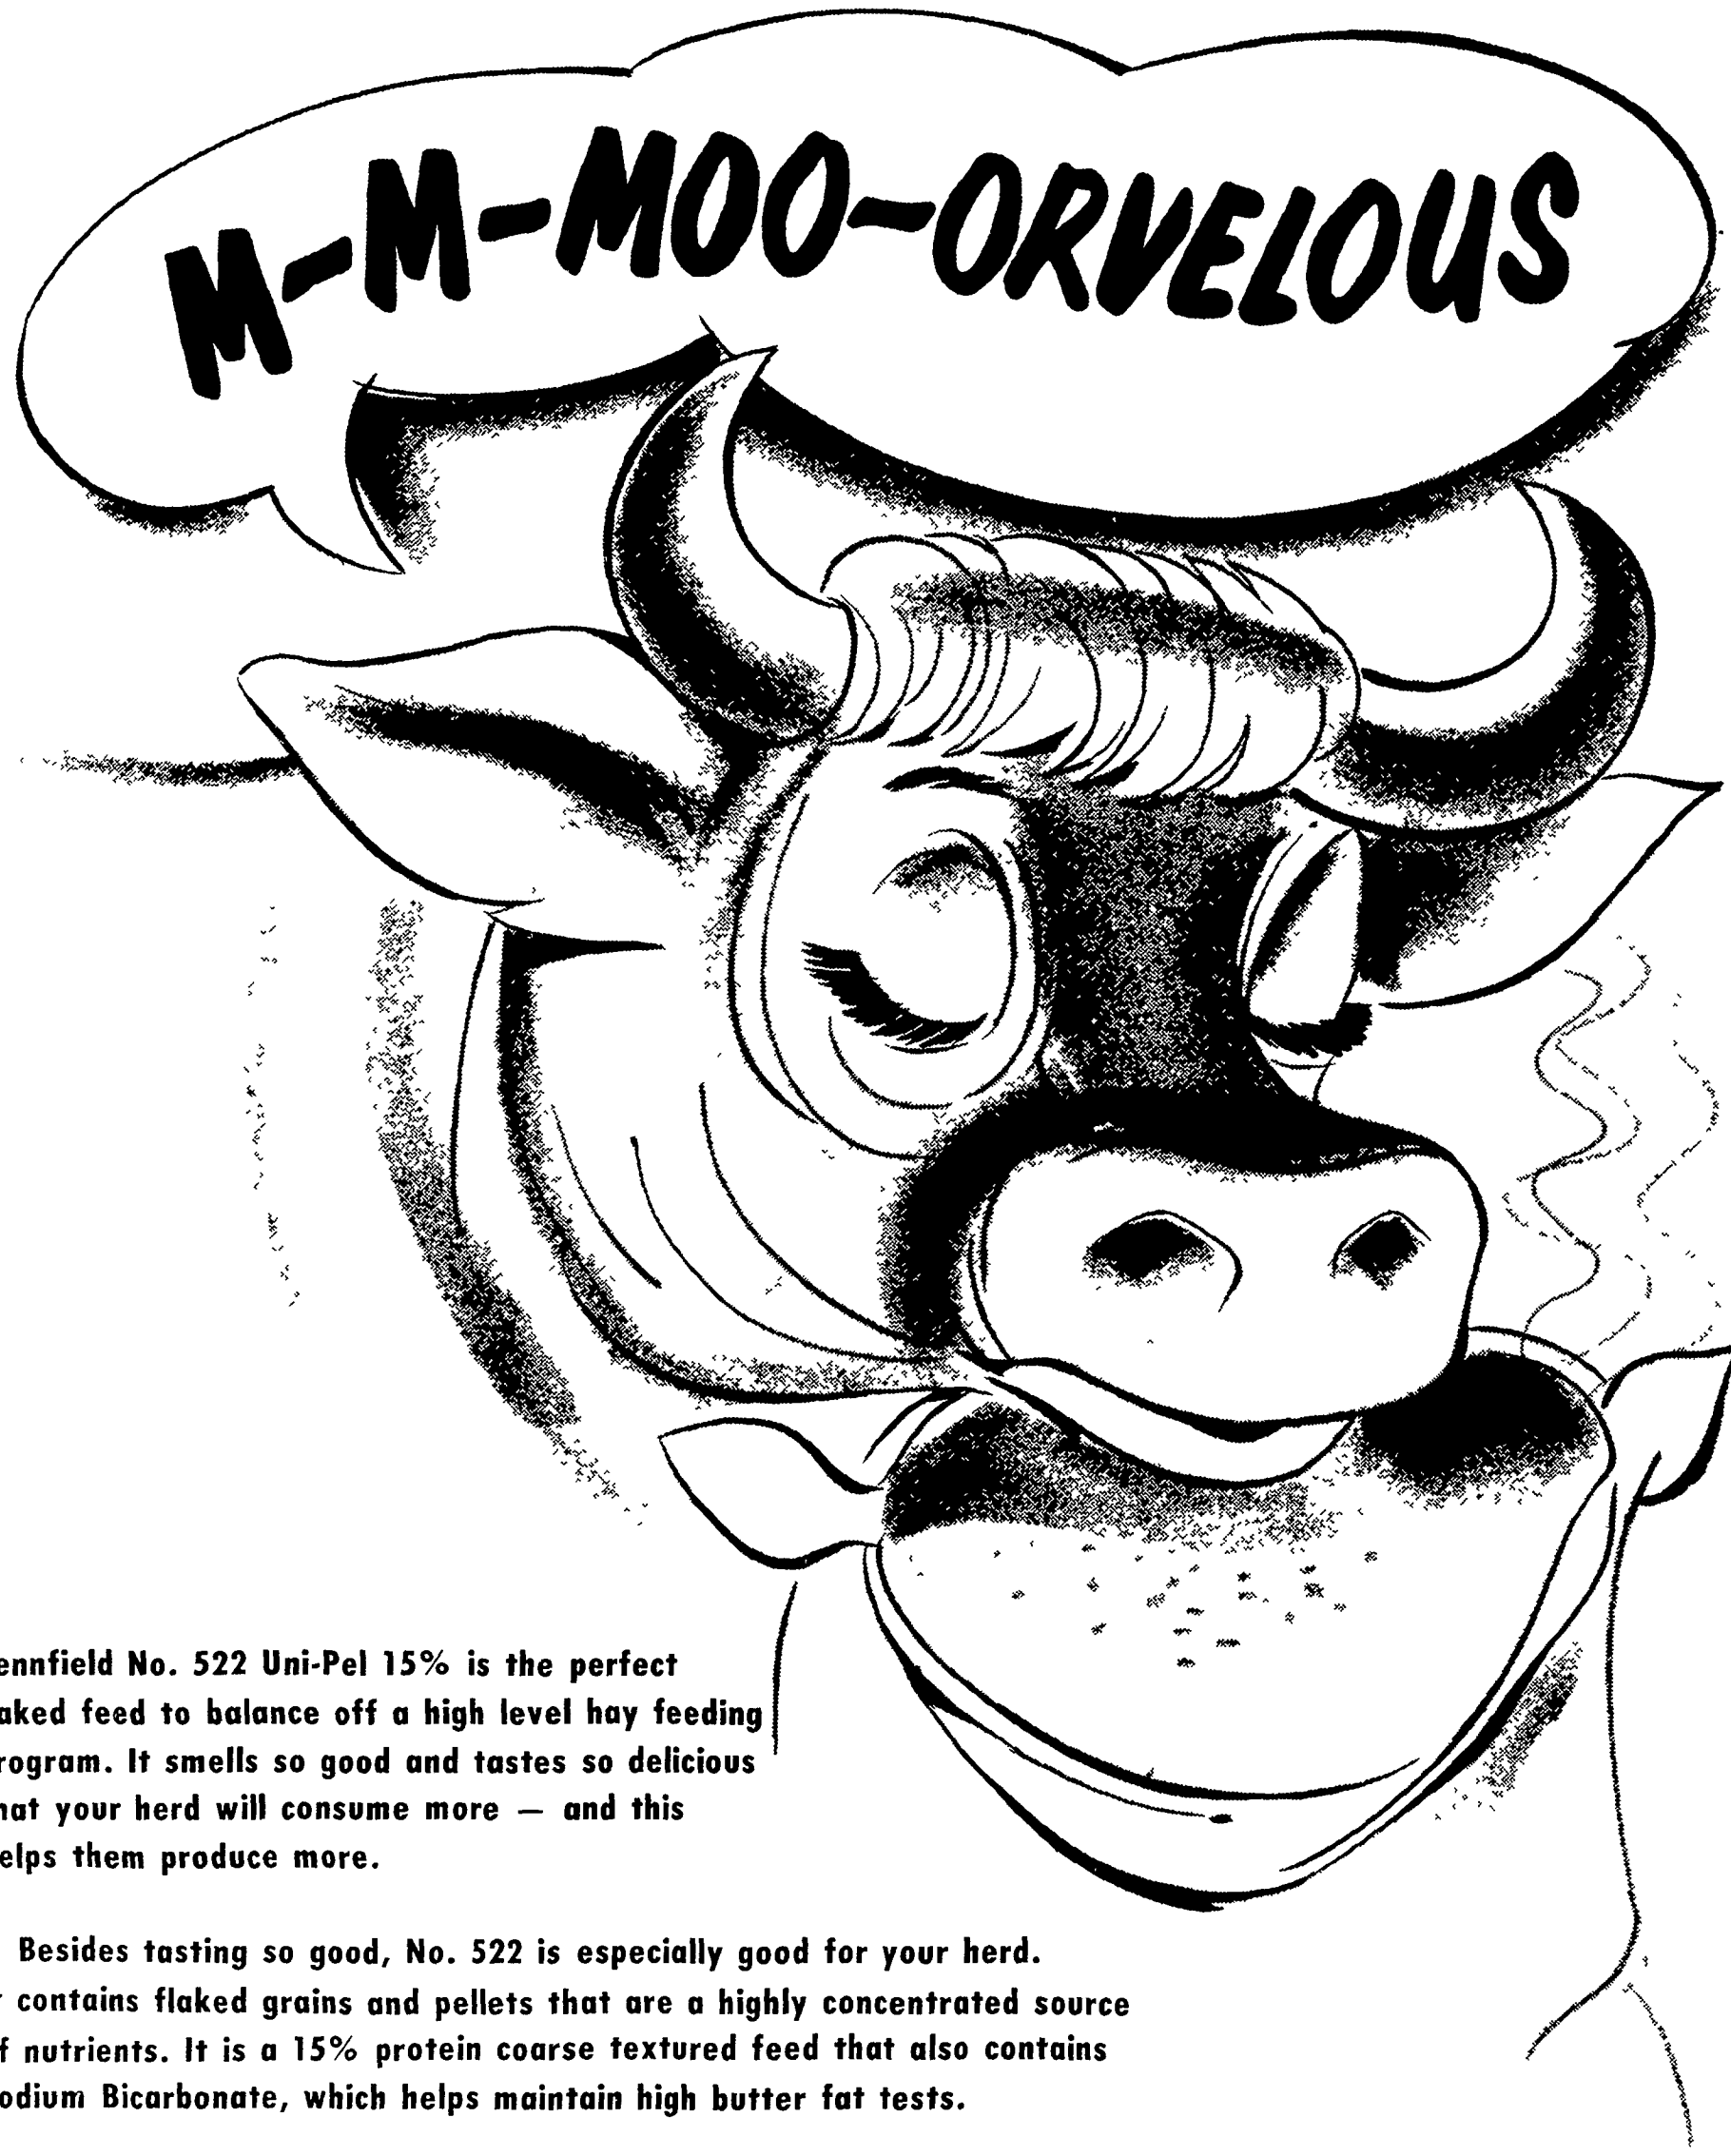
No. 522 15%. Another Uni-Pel Feed that is . . .



Pennfield No. 522 Uni-Pel 15% is the perfect flaked feed to balance off a high level hay feeding program. It smells so good and tastes so delicious that your herd will consume more — and this helps them produce more.

Besides tasting so good, No. 522 is especially good for your herd. It contains flaked grains and pellets that are a highly concentrated source of nutrients. It is a 15% protein coarse textured feed that also contains Sodium Bicarbonate, which helps maintain high butter fat tests.

With Pennfield No. 522 Uni-Pel 15%, your herd will consume and produce "M-M-MOO-MORE". Call Pennfield today and ask about it. Your herd will be glad you did.
